Osoul International Centre

All praise be to God, the Lord of all the worlds, the Creator of the heavens and earth and all creatures living in them. May God grant peace and blessings to Prophet Muhammad, God's

final Messenger, whose message brought mercy to all mankind. May He also give His blessings to all the prophets and messengers whom He sent to guide mankind out of darkness and into light.

Every new release we at Osoul International Centre for Islamic Advocacy produce gives us a great opportunity to interact with our readers. All our releases have the same overall objective, namely presenting Islam to mankind, as it truly is. We wish people to be aware of Islam's fine aspects and profound teachings. We show clearly that it is the only faith that provides practical and effective solutions to all the problems faced by humanity. It gives clear and solid answers to all the questions that have troubled people over many generations, such as: How did we come into existence and why do we exist? Where do we go from here? Furthermore, it is the only religion that requires its followers to love and respect all the prophets God sent, particularly Moses and Jesus (peace be upon them both).

Our releases also refute the accusations levelled against Islam and clarify people's misunderstandings of Islamic teachings.

In all our releases, we take care to provide solid and rational proofs for our arguments so as to give our readers the reassurance they need. Our motive is to make this great divine faith known to people. It is, by God's grace, the fastest growing religion in our time, as confirmed by a study undertaken by the Pew Research Centre and published in 2015.<sup>(1)</sup>

This book, *The Key to Understanding Islam*, states from the outset that the Qur'an is not a book of science. However, Islam respects science and scientists, giving them high status in Islamic society, and tells its followers to afford scientists the respect they deserve. The author informs his readers that he has no intention to relate the Qur'an to modern scientific discoveries. He only cites Qur'anic verses that refer to such discoveries as science have made in our present time.

The book explains that Islam is a faith that lays down a complete way of life. It comprises principles of belief that provide for genuine morality and promote the best aspects of the human soul. It also comprises a complete system of verbal and practical acts of worship. Together these ensure the pursuit of all that is noble at the individual level and strengthen social unity. Clear examples of this are illustrated in the book. As such, the book gives a solid foundation for a proper understanding of Islam.

Basil Ibn Abdullah Al-Fozan

# Introduction

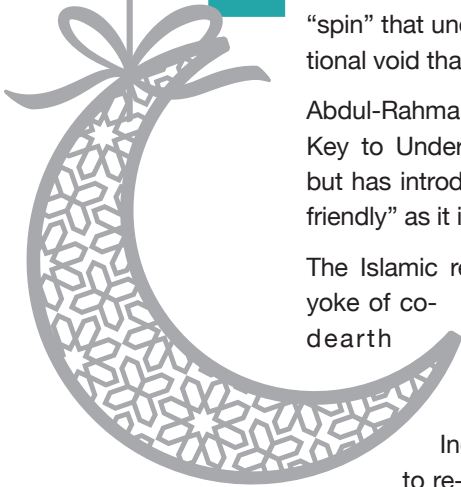

# Introduction

While the way of life known as Islam continues as the world's most populace religion—the traditional undercounting of Muslims by western statisticians notwithstanding—the availability of useful Islamic information that speaks to the needs of both practicing Muslims as well as interested others has struggled to keep pace with the expanding community. Ironically, the post-9/11 frenzy that has gripped western societies with an uncommon and often irrational loathing for global Islam has, simultaneously, piqued the interest of more inquisitive, pensive non-Muslim westerners whose skepticism of mass media accounts of predatory Islamic “extremists” and “America haters” doesn't match with their personal experiences of the Muslims they encounter in their neighborhoods, in their classrooms, or on their jobs. Consequently, they seek the truth of the religion and strike out on their own to find answers to questions that are either ignored in the popular media, or are given the familiar “spin” that underwrites misinformation. What results is an informational void that cries out for a meaningful, serious response.

Abdul-Rahman al-Sheha, in his groundbreaking compendium *The Key to Understanding Islam* has not only addressed this need, but has introduced a uniquely constructed format that is as “user friendly” as it is comprehensive and scholarly.

The Islamic revival that accompanied Muslim's throwing off the yoke of colonialism in the mid-20th century did not suffer from a dearth of scholars or scholarship aimed at consolidating new found freedoms within the divine Mercy of the Book of Allah and the traditions of His Noble Prophet. Indeed, the genius of these early Muslim sages helped to re-construct the framework that houses today's resurgent Islamic movements. But many if not all of these definitive Islamic treatises are written in a language and style that appeal to those who, for the most part, are either already Muslim, or are comfortable conversing in dense, scholarly terms. Al-Sheha's *Key*, in one simply written volume, offers a wealth of information that is, at once, revelatory for the non-Muslim who seeks a clear and con-

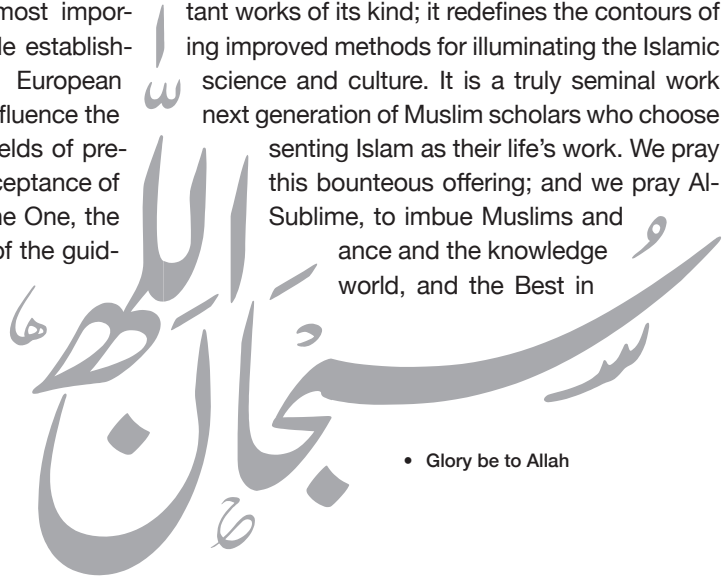

cise understanding of what IS, and what IS NOT Islam, while providing a supremely well-organized inventory of traditionally sourced overviews on faith, worship, and social issues for the practicing Muslim. Clearly, this approach to dispensing critical information

on the life-affirming message of Islam presents a fresh and wholly inviting opportunity for presenting Islam while maintaining, immutably, the pristine principles of the Faith.

The Key to Understanding Islam combines the insightful, knowledgeable eye of the scholar with the empathy of a socially conscious researcher.

The result is an informative, compelling narrative that treats, for example, the essentials of Muslim worship, and the Islamic interpretation of astrophysics, al-Haitham, and Edwin Hubble, with equal clarity and aplomb, and importantly, connects them all together with appropriate references from the Qur'an, Prophetic traditions, or both. The breadth and depth of the subject covered is truly remarkable, and stands as a testimony to the enormous talent and sagacity of the author.

In its content, its style, its singularly important contribution to the global dialogue on religion in contemporary life, al-Sheha's The Key to Understanding Islam takes its place among the most important works of its kind; it redefines the contours of this discussion while establishing improved methods for illuminating the Islamic underpinnings of European science and culture. It is a truly seminal work that will hopefully influence the next generation of Muslim scholars who choose to sow the fallow fields of presenting Islam as their life's work. We pray for the universal acceptance of this bounteous offering; and we pray Allah, the Almighty, the One, the Sublime, to imbue Muslims and non-Muslims of the guidance and the knowledge of the best in this world, and the Best in the Life to Come.

• Glory be to Allah

**The Key  
To  
Understanding  
ISLAM**

- Allah

**(Lord)** The actual word used in the Qur'an is Rubb. There is no proper equivalent for Rubb in the English language. It means the Creator, the Fashioner, the Provider, the One upon Whom all creatures depend for their means of subsistence, and the One Who gives life and causes death.

**(Religion)** The word translated as religion is Deen, which in Arabic commonly refers to a way of life, which is both private and public. It is an inclusive term meaning: acts of worship, political practice, and a detailed code of conduct, including hygiene or etiquette matters.<sup>1</sup>

A decorative border of teal and gold floral motifs, including swirls, leaves, and small flowers, framing the central text.

### Allah says:

Say (O Muslims): We believe in God and that which is revealed to us and that which was revealed to Abraham, and Ishmael, and Isaac, and Jacob, and the Tribes, and that which Moses and Jesus received, and that which the Prophets received from their Lord. We make no distinction between any of them, and to Him we have surrendered (as Muslims). (Qur'an 2:136)

- A large assembly of believers prostrating themselves to God, the Exalted, in unique array, which clearly demonstrates their humbleness and submission to Him.

**All** praise is due to Allah, the Lord of the worlds, and may He praise His Prophet ﷺ, and render him and his household safe from all evil.

This booklet explains briefly the last Divine Religion which abrogates all previous religions. According to the latest surveys, Islam is the religion of over a billion followers worldwide. People are accepting it in large numbers, despite the fact that the callers to Islam receive insufficient financial and moral backing. Moreover, one rarely hears of a Muslim apostasizing after accepting Islam!

In Islam, knowledge and scholars are highly regarded and given prestige in Muslim society. The Qur'an is not a book of science however, the Qur'an is the basic law which outlines the details of a Muslim's life. In it we find mention of political, social, economical, moral and other aspects.

My goal in this book is not to tie every modern scientific breakthrough man has discovered with a verse from the Qur'an.

I have mentioned some scientific facts in this book, merely to clarify that there are verses in the Qur'an which contain accurate scientific information, which have only been discovered very recently by modern science.

I invite all to read this book and to contemplate the signs of God and to strive to learn the true religion of God.

- the word "Quran," a verbal noun, is equivalent in meaning to "qira'ah," as both come from the verb "qara'a" which means "to read."

(I) (Lord) The actual word used in the Qur'an is Rubb. There is no proper equivalent for Rubb in the English language. It means the Creator, the Fashioner, the Provider, the One upon Whom all creatures depend for their means of subsistence, and the One Who gives life and causes death.

(II) (Religion) The word translated as religion is Deen, which in Arabic commonly refers to a way of life, which is both private and public. It is an inclusive term meaning: acts of worship, political practice, and a detailed code of conduct, including hygiene or etiquette matters.<sup>1</sup>

## What is Islam?

Islam is to submit to Allah in His Oneness (Monotheism), to be subservient to Him in obedience and not to associate any partners, rivals, and intercessors with Him. It is a religion of tolerance and ease.

Allah says:

(Allah intends for you ease and does not intend for you hardship.) (2:185)

▶ **Islam** is a religion through which one finds spiritual contentment and would have peace of heart.

Allah says:

(Those who believe, and whose hearts find their rest in the remembrance of Allah – for, verily, in the remembrance of Allah hearts do find their rest.) (13:28)

▶ **Islam** is a religion of mercy and compassion. The Messenger of Allah ﷺ<sup>(1)</sup> said:

“The All-Merciful shows mercy to those who show mercy. Show mercy to those on earth, and you will be shown mercy by the One above the heavens.” (Tirmidhi)<sup>(1)</sup>

▶ **Islam** is a religion of love and loving good for others. The Messenger of Allah ﷺ said: “The most beloved of people to Allah are those who are most beneficial to others.” (Tabaraani)

▶ **Islam** is a religion which has no confusion or ambiguity associated with it. Allah says: (And We sent not before you except men to whom We revealed [Our message]. So ask the people of the message [i.e. former scriptures] if you do not know.) (16:43)

I ﷺ means: May Peace and Blessings be upon him.

II All names mentioned after the oral traditions of the Prophet

Muhammad ﷺ are scholars who collected his sayings from his Companions and put them into books.<sup>3</sup>

- 

**Islam** is a religion for all, for it is a call directed to humankind at large, not to a specific race or people. Allah says:  
(And We have not sent you except to all of humanity, as a herald of glad tidings and a warner. But most of the people do not know.) (34:28)
- 

**Islam** is a religion which effaces all previous sins. The Prophet ﷺ said:  
“Islam effaces all (sins) committed before it.” (Muslim)
- 

**Islam** is a complete and perfect religion which abrogates all previous revelations, and it is the last religion. Allah says:  
(This day I have perfected for you your religion and completed My favor upon you and have chosen for you Islam as your religion.) (5:3)

Islam comprises a number of acts of worship, among which some are verbal, physical and creedal acts of worship. These acts of worship play an important role in refining one’s manners, purifying one’s soul, reforming oneself, and maintaining the integrity and unity of Muslim society.

## What do they say about Islam?

W. Montgomery Watt in his book: ‘What is Islam?’ said:

“Prejudice is only one of the difficulties to be met by the European or American student of Islam. As soon as he begins to describe Islam as ‘the religion of the Qur’an’, or “the religion of the four hundred million Muslims of today”, he introduces a category which does not fit the category of ‘religion’. For what does “religion” now mean to the Occidental? At best, for the ordinary man, it means a way of spending an hour or so on Sundays in practices which give him some support and strength in dealing with the problems of daily life, and which encourages him to be friendly towards other persons and to maintain the standards of sexual propriety; it has little or nothing to do with commerce or economics or politics or industrial relationships. At worst it fosters an attitude of complacency in the more prosperous individuals and breeds smugness. The European may even look at religion as an opiate developed by exploiters of the common people in order to keep them in subjugation. How different from the connotations to the Muslim of the verse (3:19): “the true religion with God is Islam!” The

<sup>(1)</sup> William Montgomery Watt, Watt is a Scottish Orientalist an Emeritus Professor in Arabic and Islamic studies at the University of Edinburgh. Watt was one of the foremost non-Muslim interpreters of Islam in the West

word translated as ‘religion’ is Dīn, which, in Arabic, commonly refers to a whole way of life. It is not a private matter for individuals, touching only the periphery of their lives, but something which is both private and public, something which permeates the whole fabric of society in a way of which men are conscious. It is all in one theological dogma, forms of worship, political theory, and a detailed code of conduct, including even matters which the European would classify as hygiene or etiquette.”<sup>(1)</sup>

## The Pillars of Islam

Physical and verbal acts of worship are called the Pillars of Islam. There are five Pillars of Islam. They are as follows:

### 01 The Testimony of Faith (Shahaadatayn):

This is the testimony that ‘none has the right to be worshipped but Allah, and that Muhammad is His slave and Messenger’. This testimony is the key with which one becomes a Muslim. The meaning of the first part of the testimony, “none has the right to be worshipped but Allah”, is that:

- 01 ▶ Allah is the Creator of all that exists.
- 02 ▶ Allah is the Proprietor of all that exists and the Disposer of all affairs.
- 03 ▶ Allah is the One Who deserves to be worshipped alone.

- There is no other God worthy of worship except Allah, and Mohammad is his messenger.

• God

• Muhammad

The meaning of the second part of the testimony, ‘Muhammad is His slave and Messenger’ contains the following meanings:

- 01  To obey the Messenger ﷺ in what he ordered.
- 02  To believe in everything he said.
- 03  To refrain from what he prohibited and warned against.
- 04  And that you do not worship Allah except by what the Messenger ﷺ legislated.

## Who is the Messenger of Islam?

He is Abul-Qasim, Muhammad, the son of Abdu-llah, the son of Abdul-Mutalib, the son of Hashim. He belonged to the Arab tribe of Quraish whose ancestry traces back to ‘Adnaan, one of the children of Ismaa’eel (Ishmael), the Prophet of Allah. Ishmael was the son of Ibraaheem (Abraham), who was the Messenger of Allah, may Allah praise him.

He was born in the year 571 C.E. in the honored city of Makkah. Makkah was the religious center of the Arabian Peninsula, as it housed the Honored Ka’bah, which was built by Abraham and his son, Ishmael.

Even before he received revelation, he was known amongst his people as ‘The Trustworthy’, and they would entrust him with their possessions when they intended to go on a journey. He was also known as ‘The Truthful’. He never lied or acted treacherously. He always desired good for others.

He received his first revelation at the age of forty and informed his wife, Khadeejah, may Allah be pleased with her, apprehensively:

“Indeed I fear for myself.” Khadeejah replied, “No, by Allah! Allah will never humiliate you. Indeed you maintain ties of kinship, you bear the problems of others, you give wealth to those who do not have it, you honor and feed your guests, and you give support in times of true calamity.” (Bukhari)

He remained in Makkah for thirteen years thereafter, calling people to

believe in the Oneness of Allah. He then migrated to the city of Medina and called its inhabitants to Islam, which they accepted. There, Allah revealed to him the remaining legislations of the religion. He returned and conquered Makkah eight years after his migration, and died at the age of sixty three after Allah revealed to him the entire Qur'an. All of the legislations of the religion were perfected and completed and the majority of the Arab nations accepted Islam.

## What do they say about Muhammad ﷺ?

George Bernard Shaw in *The Genuine Islam* said:

“I have always held the religion of Muhammad in high estimation because of its wonderful vitality. It is the only religion which appears to possess that assimilating capability to the changing phases of existence which make itself appeal to every age - I have prophesized about the faith of Muhammad that it would be acceptable tomorrow as it is beginning to be acceptable to the Europe of today. Medieval ecclesiastics, either through ignorance or bigotry, painted Mohammedanism in the darkest colors. They were, in fact, trained to hate both the man Muhammad and his religion. To them, Muhammad was an anti-Christ. I have studied him, the wonderful man, and in my opinion, far from being an anti-Christ, he must be called the Savior of Humanity.”<sup>(1)</sup>

<sup>(1)</sup> George Bernard Shaw  
An Irish playwright and a co-founder of the London School of Economics. He is the only person to have been awarded both an Oscar and a Nobel Prize for Literature  
*The Genuine Islam*. Vol. 1, No. 8, 1936.

Annie Besant<sup>(2)</sup> in *The Life and Teachings of Mohammad*, said:

“It is impossible for anyone who studies the life and character of the great Prophet of Arabia, who knew how he taught and how he lived, to feel anything but reverence for the mighty Prophet, one of the great messengers of the Supreme. And although in what I put to you I shall say many things which may be familiar to many, yet I myself feel, whenever I reread them, a new way of admiration, a new sense of reverence for that mighty Arabian teacher.”

## 02 The Prayer (Salaah):

The prayer is a means through which a slave of Allah maintains a relationship between him/herself and his/her Lord. In it, the person privately converses with his/her Lord, seeking His forgiveness and asking Him for help and guidance. There are five prayers which must be performed daily. Men observe them in the Masjid (mosque) in congregation, except for those who have a valid excuse. Through this, Muslims come to know one another, and the bonds of love and unity which hold them together are built, maintained and strengthened. They come to know of the condition of their fellow Muslims on a daily basis. If someone is not present and thought to be sick, they visit him, and if it seems that he is falling short in some of his obligations, they advise him. All social differences, such as class, race, and lineage are disregarded. Muslims line up side by side in straight rows, all facing one direction (Makkah), all at the same time. All are rendered equal in regards to their subservience to Allah when standing before Him.

## 03 The Obligatory Charity (Zakaah):

This charity is a small percentage of wealth which a rich Muslim gives to his less fortunate brothers and sisters. There are certain conditions under which it is to be given. A Muslim gives it willingly and fulfills the command of Allah when giving it out.

The goal behind the obligation of this charity is to revive mutual and social support among Muslims, as well as to eradicate poverty and put an end to the dangers which result from it. Through it, the hearts of the rich are cleansed from greed, and the hearts of the poor are cleansed from hate and jealousy which they may feel towards the rich. They see the rich giving from their wealth that which Allah decreed, continuously giving them money and caring for their needs.

لَبَّيْكَ اللَّهُمَّ رَبَّيْكَ لَبَّيْكَ لَا شَرِيكَ لَكَ رَبَّيْكَ

• here I am They service O lord, here I am at Thy service and Thou hast no partners

## 04 The Fast of Ramadan (Siyaam):

It is obligatory upon every Muslim to fast once a year, for the entire month of Ramadan. From the break of dawn until the sun sets, Muslims must abstain from anything that breaks the fast, whether it is food, drink, or sexual intercourse. Fasting is an act of worship in Islam and was an obligation legislated in the previous religions as well.

Allah says:

(O you who have believed, fasting has been decreed for you as it was decreed upon those before you that you may become righteous.) (2:183)

• Ramadan Kareem

## 05 The Pilgrimage (Hajj):

Hajj is the pilgrimage one makes to the Sacred House of Allah (the Ka'bah) in order to perform certain rites at specific places and times. This pillar of Islam is obligatory upon every Muslim, male or female, who is sane and has reached the age of puberty once in a lifetime, if they have the physical and financial capability to perform it.

Allah says:

(Pilgrimage to the House is a duty owed to Allah by all people who are able to undertake it. And as for those who deny the truth – verily, Allah does not stand in need of anything in all the worlds.) (3:97)

Hajj is the largest Islamic gathering. Muslims from all over the world come together in one place at one time; they all call upon the same Lord, wear the same clothes, and perform the same rituals. No difference is made between rich and poor, noble and ignoble, white and black, Arab and non-Arab; all are equal in front of Allah. There is no difference between them except in piety (taqwaa). The Hajj is an event which emphasizes the brotherhood of all Muslims and the unity of their hopes and feelings.

## Pillars of Faith

Creedal acts of worship are called the Pillars of Faith (Imaan); and there are six Pillars of Faith. They are as follows:

- This is the 112th chapter in the Qur'an. It was revealed when the polytheists asked Prophet Muhammad to describe the Lord of the worlds

### Belief in Allah:

Belief in Allah entails belief in His existence, that He is the only One Who deserves to be worshipped, and He has no partners, equals or rivals in His Lordship (Ruboobiyah)<sup>(1)</sup>, Unity (Uloohiyah)<sup>(2)</sup>, and His beautiful Names and Attributes<sup>(3)</sup>. He is the Creator of this existence, its Proprietor and the One who disposes of all its affairs. Only that which He wishes comes to pass and He is the only One who deserves to be worshipped.

Allah says:

(Say, 'He is Allah, [who is] One. \* Allah As-Samad [the Self-Sufficient Master, Whom all creatures need]. \* He neither begets nor is born. \* Nor is there to Him any equal. ) (112:1-4)

(1) That is to attest that Allah exists, and that He is the Creator of this universe and its Owner. He is the One Who causes all things to happen; nothing comes into existence except if He wills it, and nothing occurs except if He desires it.

(2) It is to attest that Allah is the only true god, Who deserves to be worshipped, and all acts of worship must be dedicated to Him alone.

(3) That is to believe in the uniqueness of His Names and Attributes and that the beautiful Names and Attributes belong to Allah and that He is far removed from every imperfection.

### Belief in Allah's Angels:

This is to believe that the angels exist. No one knows their exact number except Him (Allah). He created them to worship Him.

Allah says:

(Never would the Messiah disdain to be a slave of Allah, nor would the angels near [to Allah].) (4:172)

The angels do not share any of Allah's specific qualities, nor are they His children. Rather, Allah created them to perform certain tasks.

Allah says:

(And they say, 'The Most Merciful has taken a son.' Exalted is He! Rather, they [Those they claim to be 'children' of Allah, such as the angels, Ezra, Jesus, etc.] are [but] honored slaves. They cannot precede Him in word, and they act by His command ) (21:26- 27)

### 03 Belief in Allah's Books:

It is to believe that Allah revealed Divine Books to His Messengers in order for them to be conveyed to humankind. These Books contained nothing but the truth at the time of revelation. All these Books called people to the Oneness of Allah, and that He is the Creator, Proprietor and Owner, and to Him belong the beautiful Names and Attributes. Some of these Books are as follows:

▶ **The Suhuf: (Scriptures of Abraham):** The Suhuf are the Sacred Scriptures which was revealed to Prophet Abraham.

▶ **The Tawraah: (Torah):** The Torah is the Sacred Book which was revealed to Prophet Moses.

▶ **The Zaboor: (Psalms):** The Zaboor is the Sacred Book which was revealed to Prophet David.

▶ **The Injeel: (Gospel):** The Injeel is the Sacred Book which was revealed to Prophet Jesus.

▶ **The Noble Qur'an:** One must believe that the Qur'an is the Speech of Allah which Angel Gabriel brought to Muhammad ﷺ and that it is the last of the Divine Books which abrogated all previous Books.

• The Holy Qur'an

## What is the Qur'an?

The Qur'an is the constitution of the Muslims from which they derive the teachings which organize both their religious and everyday affairs. It differs from the previous Divine Books in the following ways:

- ▶ It is the last Divine Book which was revealed, and for that reason, Allah, the Exalted, promised to protect it from any distortion until the Last Day.

Allah says:

(Indeed, it is We who have sent down this Reminder [i.e., the Qur'an] and indeed, it is We Who are its Guardian.) (15:9)

- ▶ The Qur'an includes all the legislations which reform society and guarantees happiness for all in its implementation.
- ▶ The Qur'an has documented the stories of the Prophets and Messengers, and what happened between them and their peoples, from Adam till Muhammad ﷺ.
- ▶ It was revealed to all of humankind so that they would live a life of peace and happiness, and to take them out of darkness and bring them into the light.
- ▶ Reciting, memorizing and teaching it are acts of worship.

## What do they say about the Qur'an?

<sup>(1)</sup> **Maurice Bucaille**  
French surgeon, scientist,  
scholar and author

**Maurice Bucaille<sup>(1)</sup>** said in his Book: *The Qur'an, and Modern Science*: 'A totally objective examination of it [the Qur'an] in the light of modern knowledge, leads us to recognize the agreement between the two, as has been already noted on repeated occasions. It makes us deem it quite unthinkable for a man of Muhammad's time to have been the author of such statements, on account of the state of knowledge in his day. Such considerations are part of what gives the Qur'anic Revelation its unique place, and forces the impartial scientist to admit his inability to provide an explanation which calls solely upon materialistic reasoning.'

04

## Belief in the Messengers of Allah:

It is to believe that Allah chose the finest among mankind to be Messengers whom He sent to His creation with specific legislations; to worship and obey Him, and to establish His religion and His Tawheed (oneness). Allah ordered His Messengers to convey the Message to people, so that they would not have any proof against Him after He sent them.

Allah says:

(And We sent not before you, [O Muhammad] except men to whom We revealed [the message] so ask the people of the message [i.e., former scriptures] if you do not know. ) (21:7)

The first Messenger was Noah and the last was Muhammad ﷺ.

05

## Belief in Judgment Day:

It is to believe that the life of this world will come to an end. Allah says: (Everyone upon it [i.e., the earth] will perish. And there will remain the Face of your Lord, Owner of Majesty and Honor.) (55:26-27)

Following this, Allah will resurrect all creation, take them to account and reward those who did well, due to their righteous deeds, belief (in Allah) and adherence to their Prophets and Messengers with an everlasting life in Jannah (The Heavenly Gardens).

He will punish those who committed evil deeds, disbelief, and were disobedient to their messengers, with an everlasting life in Hell.

كَلَّمَ عَلَىٰ مَا فِئْتَانِ  
وَيَبْقَىٰ وَجْهَ رَبِّكَ ذُو الْجَلَالِ وَالْإِكْرَامِ

- Everyone upon it [i.e., the earth] will perish. And there will remain the Face of your Lord, Owner of Majesty and Honor (55:26 -27)

## 06 Belief in Qadhaa and Qadar (Predestination):

It is to believe that Allah knew everything before it came into being, and what will happen to it afterwards. He then brought them into existence, all in accordance with His Knowledge and Measure.

- woman sitting alone on wheelchair

Allah said:

(...and [Allah] has created each thing and measured it with [precise] measure. ) (25:2)

This belief does not contradict the fact that one must strive to attain things. Belief in Divine Measure results in the following:

01 ► Belief in Qadhaa and Qadar results in a clear conscience and peace of heart. No room is left for one to feel sad about what happen or does not come to be.

02 ► It encourages knowledge and exploration of what Allah created in this universe. Afflictions, such as diseases drive humans to seek a cure; this is done by searching for the sources of medicine which Allah, the Most High, created in this universe.

03 ► It increases one's dependence upon Allah and removes fear of the creation. Ibn 'Abbaas (It) said "I was behind the Messenger of Allah ﷺ one day and he ﷺ said to me:

"O young boy, I will teach you some words: Guard Allah's commandments and He will guard you. Guard Allah's commandments, you will find Him in front of you. If you ask, then ask Allah, and if you seek help, then seek help from Allah and know that if the whole world was to gather to help you, they would never be able to help you except with something which Allah has already preordained for you. And if the whole world gathered to cause you some harm, they would not be able to harm you except with something which Allah has already preordained for you. The pens have been lifted, and the scrolls have dried." (Tirmidhi)

## The Fundamental Goals of Islam

The fundamental goals of Islam are:

- 01 ► Preservation of the religion of Islam
- 02 ► Preservation of life
- 03 ► Preservation of wealth
- 04 ► Preservation of mind
- 05 ► Preservation of lineage
- 06 ► Preservation of honor

• Islam

The Prophet of Allah, Muhammad ﷺ said:

“Indeed Allah has made your lives, your wealth, and your honor inviolable, like the sanctity of this day (the Day of ‘Arafah in Hajj), in this [sacred] month (the month of Dhul-Hijjah, the 12th month of the Islamic Calendar) in this [sacred] locality (Makkah and its surroundings). (Bukhari)

He ﷺ also said:

“Shall I tell you who a true believer is? A person with whom others entrust their money and lives. A Muslim is one from whose tongue and hand others are safe. A true fighter in the path of Allah is one who strives against the inner yearnings of his self in order to obey Allah, and the true emigrant (one who leaves a land of disbelief and emigrates to a land of belief) is one who leaves sins and wrongful acts.” (Ibn Hibban)

- Skyline with Abraj Al Bait (Royal Clock Tower Makkah) (left) in Makkah, Saudi Arabia. The tower is the tallest clock tower in the world at 601m (1972 feet), built at a cost of USD1.5 billion.

## Etiquette, Manners, and Morals in Islam

Islam forbids all evil and licentious acts, whether in speech or deed.

Allah says:

(Say, 'My Lord has only forbidden immoralities - what is apparent of them and what is concealed - and sin, and oppression without right, and that you associate with Allah that which He has not sent down authority, and that you say about Allah that which you do not know.) (7:33)

It orders and encourages all good morals and manners. The Prophet of Allah, Muhammad ﷺ said:

"I have been sent to perfect righteous and honorable manners." (Hakim)

Allah the Exalted and Almighty said in the Glorious Qur'ân:

("Say: "Come, I will rehearse what Allah has (really) prohibited you from": join not anything as equal with Him; be good to your parents; kill not your children on a plea of want - We provide sustenance for you and for them - come not nigh to shameful deeds, whether open or secret; take not life, which Allah has made sacred, except by way of justice and law: thus does He command you, that you may learn wisdom." ) (6:151)

The Messenger of Allah ﷺ said:

"None of you believes until he loves for his brother what he loves for himself." (Bukhari)

- I have been sent to perfect righteous and honorable manners

بَعِثْتَنِي لَأَتَمِّمَنَّكَ صَالِحَ الْأَخْلَاقِ

# 04

## Rights in Islam

Islam has prescribed that its followers give people their due rights. Parents, spouses, children, neighbours; all are given specific rights according to their specific roles in this world. Accordingly mutual bonds and solidity established and strengthened between the individuals of a Muslim society. This spreads love and unity and prevents the society from fragmenting. Allah says:

(And worship Allah [alone], and do not ascribe partners to Him. And do good unto your parents and near of kin and unto orphans, and the needy, and the neighbor from among your own people, and the neighbor who is a stranger, and the friend by your side, and the wayfarer, and those whom your right hands possess. Verily, Allah does not love those who are full of self-conceit and boastful.) (4:36)

- Allah does not love those who are full of self-conceit and boastful

The Prophet ﷺ said:

“Everyone of you is a guardian, and responsible for what is in his custody. The ruler is a guardian of his subjects and responsible for them; a husband is a guardian of his family and is responsible for it; a woman is a guardian of her husband’s house and is responsible for it, and a servant is a guardian of his master’s property and is responsible for it.” (Bukhari)

Also, the paths which people traverse have their rights that must be fulfilled.

The Messenger of Allah, Muhammad ﷺ said:

“Be careful and stay away from sitting on the paths.” They said, “O Messenger of Allah, we have no other place to gather and talk.” So he replied, “If you must do so, then give the path its right.” They said, “And what is the right of the path?” He ﷺ replied, “Lowering one’s gaze (not looking at members of the opposite sex), not bringing harm to others, replying to salutations, and enjoining good and forbidding evil.” (Bukhari)

Even animals have rights. Showing them compassion and treating them well is a means to attain forgiveness of one's sins. The Messenger of Allah, Muhammad ﷺ said:

“Once a man was tending to some business, and became very thirsty. He came across a well, so he descended into it and drank from it. [When he came out], he saw a dog panting and rolling his mouth in dirt (in search of water) due to thirst. The man said, ‘This dog is as thirsty as I was.’ So he descended [once again] filled his boot with water and gave drink to the dog. [Due to that] Allah rewarded him by forgiv-

ing his sins.” They said, “O Messenger of Allah, will we be rewarded even due to our welfreatment of animals?” He replied, “Yes indeed. For [the welfreatment of] every fresh liver (living thing) you will receive reward.” (Bukhari)

- Islam has made mistreating animals, such as confining them [without food or drink] or torturing them

Islam has made mistreating animals, such as confining them [without food or drink] or torturing them, reasons for entering Hellfire. The Messenger of Allah, Muhammad ﷺ said:

“A woman was punished due to a cat. She imprisoned it until it died, so she entered the Hellfire because of this. She did not feed it nor give it drink when she kept it, nor did she let it free to eat insects (and other things) of the earth.” (Bukhari)

If this is the mercy Islam shows to animals, how much more mercy would it show to humans, whom Allah has preferred and honored over all other creatures?

## What do you know about Islam?

**The Ka'bah:** When Ishmael - son of Abraham and Hagar - was born, Abraham's other wife, Sarah, became jealous, so she asked Abraham to keep them away from her. Allah, the Exalted, inspired Abraham to take them to Makkah. He would visit them from time to time. Once, he stayed away from them for a period of time, and upon returning he saw Ishmael shooting arrows near the well of Zamzam. When he saw him, he embraced him the way a father would embrace his son, and said: 'O Ishmael, Allah has commanded me to build a House here.' Together they erected the walls of the House of Allah. Ishmael gathered the rocks and Abraham set them. As the walls were being erected, he placed a stone where he stood and Ibraheem and his son supplicated to Allah saying: 'O Allah accept from us, for indeed You are All-Hearing and All-Seeing.'

Muslims all over the world face the Ka'bah during their prayers; it is the first House of Allah. Allah says: (Indeed, the first House [of worship] established for mankind was at Bakkah [i.e. Makkah] – blessed and a guidance for the worlds.) (3:96)

It is a symbol of Muslim's unity. Muslims face the Ka'bah with their hearts and bodies.

Allah says:

(So wherever you might turn, there is the Face of Allah [and He is High above, over His Throne].) (2:115)

When the Muslims circumambulate around the House, they are not worshipping it, for they worship Allah alone. Allah says:

(Let them worship the Lord of this House, Who has fed them [saving them] from hunger and made them safe from fear.) (106:3-4)

- Pilgrims go around the 'Ka'bah' during the Hajj season. The Sacred Masjid al-Haram in Makkah can accommodate over two million people at any one time.

02

**The Black Stone:** After Abraham finished erecting the Ka'bah, one rock was missing (in order to complete the Ka'bah) so he asked Ishmael to look for a rock. He searched and upon returning he found that his father had placed a rock. So he asked his father: "O father where did you get this rock from?" He said: "Gabriel brought it to me from the Heavens." And they completed the erection of the Ka'bah.

- The Black Stone The Black Stone is the eastern cornerstone of the Kaaba. It is revered by Muslims as an Islamic relic which, according to Muslim tradition, dates back to the time of Adam and Eve

When this rock was sent down from the heavens, it was whiter than milk. The Prophet ﷺ said:

"The Black Stone was sent down from the heavens whiter than milk and it was blackened by the sins of man." (Tirmidhi)

The Black Stone is positioned at the south corner of the Ka'bah next to its door. It is about 1.10 meters above the ground and is set into the wall of the Ka'bah. The one who circumambulates around the Ka'bah must make sure the Black Stone is to their left.

03

### Station of Abraham:

The Prophet ﷺ said:

"The Yemeni corner and Station of Ibraheem are two precious stones from Jannah (Heavenly Gardens), and had it not been that Allah removed their light, they would have enlightened all that was between the east and the west." (Ibn Hibban)

The Station of Abraham is the rock upon which Abraham stood while erecting the Ka'bah. His son Ishmael helped him erect it, by passing him the rocks.

- Station of Ibraheem are two precious stones from Jannah (Heavenly Gardens), and had it not been that Allah removed their light, they would have enlightened all that was between the east and the west.' (Ibn Hibban)

As Prophet Abraham was placing the stones, his footprints were cast on the very stone he stood on. Both Prophet Abraham and his son Ishmael were supplicating Allah:

“O our Lord accept from us! Indeed you are the All-hearing and All-seeing.” The footprints of Prophet Abraham are still visible today. At present, it is encased in a dome. God orders the believers to perform prayers behind this station, saying: ( And We charged Abraham and Ishmael, [saying], “Purify My House for those who perform Tawaf (i.e. circumambulate around the House) and those who are staying [there] for worship and those who bow and prostrate [in prayer].”) (2:125)

04

**The Well of Zamzam:** Abraham took Hagar and her son, Ishmael to a place near the Ka’bah; he left them under a tree at the site of Zamzam. No one lived in Makkah back then, yet Abraham made them sit there, leaving them with some dates, and a small water-skin. Thereafter he set out towards home. Ishmael’s mother followed him saying: “O Abraham! Where are you going? There is no person whose company we may enjoy, nor is there anything to take pleasure in.” She repeated that to him many times, but he did not look back at her. Then she asked him: ‘Has Allah ordered you to do so?’ He said: ‘Yes.’ She said, ‘Then He will not neglect us.’ Abraham proceeded onwards, and upon reaching a hill where they could not see him, he faced the Ka’bah and invoked Allah saying:

(Our Lord, I have settled some of my descendants in an uncultivated valley near Your Sacred House. Our Lord, that they may establish prayer. So make

- The Well of Zamzam is a well located within the Masjid al-Haram in Mecca, 20 m east of the Kaaba, it is a miraculously-generated source of water from God
- The well is situated 21 meters from the Ka'bah. It is hand excavated and is about 30 meters deep, with an internal diameter ranging from 1.08 to 2.66 m

- The distance between Safaa and Marwaa is approximately 450 meters, so that seven trips amount to roughly 3.15 kilometers.

hearts among the people incline toward them and provide for them from the fruits that they might be grateful.) (14:37)

Hagar suckled Ishmael and drank from the water she had. When the water finished, she and her child became very thirsty, she saw her child in agony while he cried. So she rushed to the nearest hillock, which was the hillock of Safaa, she stood there and looked intensely hoping she might see someone, but she could not see anyone. She then descended and once she reached the valley, she tucked up her robe and ran in the valley distressed, until she reached the hillock of Marwaa. She gazed attentively, hoping to see someone, but she could not. She repeated this seven times.

Ibn Ab'bas said:

The Prophet ﷺ said, “This is the origin of the tradition of Sa'y (walking and running) between the hillocks of Safaa and Marwaa. When she reached al-Marwa (for the last time) she heard a voice and she calmed herself and listened attentively. She heard the voice again and said, ‘O, (whoever you may be)! You have made me hear your voice; have you got something to help me?’ And behold! She saw an angel at the place of Zamzam tapping the earth with its wing till water gushed from that place. Hagar quickly contained the water by making a barrier around it. She filled her waterskin.” The Prophet ﷺ added, “May Allah bestow mercy on Ishmael's mother! Had she let the Zamzam flow without trying to control it or had she not scooped from that water to fill her water skin, Zamzam would have been a stream flowing on the surface of the earth.” (Bukhari)

**Safaa and Marwaa:** These are the two hillocks which the mother of Ishmael ran between and stood upon while searching for provisions and water. In Hajj people walk and run between these two hillocks in adherence to the Sunnah of the Prophet.

06

**Jamaraat:** These are the places that Satan approached Abraham when he left his wife and son in Makkah, in order to make him hesitate from acting upon Allah's orders. He took a few stones and pelted Satan. During Hajj, Muslims throw stones at these pillars, in adherence to the Sunnah of their father, Abraham. They proclaim Satan an open enemy who must be resisted; this is done by resisting the satanic desires and obeying the commands of Allah and abstaining from the prohibitions.

- There are three Jamarat in Mina: Jamratul Aqabah, Jamratul Wusta and Jamratul-Sughra

07

## Muslim's Eid Celebrations:

Muslims have two celebrations a year; Eid al-Fitr, which is celebrated at the end of the Month of Ramadhan, and it signifies the end of the Fasting season. The second Eid festival is called Eid al-Adha, it is called such because Muslims seek nearness to Allah by slaughtering sacrificial animals in adherence to the example of our father Ibraheem. He saw in a dream that he was sacrificing his son Ishmael, and the dreams of the Prophets are true. When he was about to sacrifice his son, Allah said:

(So We gave him good tidings of a forbearing boy. And when he reached with him [the age of] exertion, he said, "O my son, indeed I have seen in a dream that I [must] sacrifice you, so see what you think.' He said, "O my father, do as you are commanded. You will find me, if Allah wills, of the steadfast." And when they had both submitted and he put Ishmael down upon his forehead. We called to Abraham, "O Abraham you have fulfilled the vision. Indeed We thus reward the doers of good.") (37:101-105)

- This is an Arabic word which means wish you well this year and years to come. It was written in calligraphy style called (tagra) which were used by the Ottoman sultans as a seal during the Islamic Khilafah.

- The Prophet's Mosque in Madinah can accommodate over two million people at one time. Muslims perform prayer in the Prophet's Mosque in order to attain the great reward promised for the one who performs prayer in it.

- The Dome of the Rock, is a shrine located on the Temple Mount in the Old City of Jerusalem. It was initially completed in 691 CE at the order of Umayyad Caliph Abd al-Malik during the Second Fitna. The Dome of the Rock is now one of the oldest works of Islamic architecture.

**08 The Prophet's Masjid:** It is the first Masjid to be built in Islam. The Prophet ﷺ was buried in his house, which was adjacent to the Masjid, as Prophets are to be buried where they die. It is praiseworthy to greet the Prophet ﷺ when one passes by his grave.

**09 Mount Hira:** The Prophet ﷺ used to spend many nights at a time in this cave. Gabriel brought him the first revelation while he was in this cave. Muslims should not go there, since the Prophet ﷺ after being commissioned as a prophet never returned to this cave.

**10 Masjid of the Dome of the Rock:** The rock is one of the boulders adjacent to the Mosque of al-Aqsa. The boulder itself is about 18 high and 13 meters wide. At present it is housed under a dome, known as the 'Dome of the Rock'. This was built by the Umayyad Caliph, Abdul-Malik bin Marwan and is usually confused with the Mosque of Al-Aqsa.

**11 Masjid Aqsa:** The Mosque of al-Aqsa is situated on a sacred land, chosen by God from the beginning of time. It has been rendered as such so that the believers would glorify God. The Mosque of al-Aqsa is the second place of worship that was established on the Earth. Abu Dhar said:

I said, "O Messenger of Allah, what is the first Masjid placed on the earth?" He said: "Masjid Haraam". I then asked: "What is the second Masjid?" He said "Masjid al-Aqsa". I asked: "What is the time period between the placements of these two Mosques?" He said: "Forty years, and wherever you have to pray, perform the prayer, since the Earth has been made a place of prayer." (Muslim)

When Prophet Adam built the Ka'bah, God ordered him to go

to where the Mosque of al-Aqsa stands today. He ordered him to build the Mosque and to worship God there. This was the very first place of worship to be built in that region.

After Prophet Adam, Prophet Solomon restored the Mosque and expanded it. Prophet Muhammad ﷺ said:

“After Solomon, son of David, finished building Masjid al-Aqsa, he asked Allah to bestow him a Rule and Kingdom like no one had before which was not befitting to anyone afterwards. Also that no one would come to this Masjid seeking to pray in it, except that he would return from it sin-free.” The Prophet ﷺ said: “As for two (of the three requests) he was granted, and I hope that he will be granted the third.” (Ibn Khuzaimah)

It is the first of the two Qiblahs (direction of prayer) the Prophet ﷺ faced in his prayers and the Muslims prayed towards it before they were ordered to pray facing the Ka’bah. During the Night Journey, he stopped at Masjid al-Aqsa, and from there he ascended to the Heavens. He led the prophets in prayer during this night journey. It is the third Haram (sacred sanctuary), after Makkah and Madinah.

## Islam and Wealth

In Islam, all wealth is the possession of Allah with which humans are entrusted. It is a responsibility which must be earned through permissible means and spent in permissible ways, such as spending on one’s self and those for whom he is responsible for, without extravagance or waste. The Messenger of Allah, Muhammad ﷺ said:

“A slave will not be able to take a step further on the Day of Requitul until he is taken to account for [the following things]: his time and how he spent it, his knowledge and how he used it, his money and how he earned and spent it, and his youth and how he used it.” (Tirmidhi)

It must also be spent in good ways. Allah says:

(Righteousness is not that you turn your faces toward the east or the west, but [true] righteousness is [in] one who believes in Allah, the Last Day, the Angels, the Book, and the prophets and gives wealth, in spite of love for it, to relatives, orphans, the needy, the traveller, those who ask [for help], and for freeing slaves.) (2:177)

انما النصف الثاني للنصف الاول  
انما النصف الثاني للنصف الاول

- Women are the twin halves of men

## Islam and Women

In Islam, men and women are different from each other and each has their respective roles. Honoring and respecting women in Islam is a sign of a good, wholesome character and an unadulterated nature. The Messenger of Allah, Muhammad ﷺ said:

“The best of you are the best of you towards their wives.” (Tirmidhi)

The woman is also the first person to whom a man must act righteously, maintain ties with, and treat well. When a man asked the Messenger of Allah, Muhammad ﷺ to whom he should show the best companionship, he replied:

“Your mother.” He said, “Then who?” He said, “Your mother.” He said, “Then who?” He said, “Your mother.” He said, “Then who?” He said, “Your father.” (Bukhari)

The Messenger of Allah, Muhammad ﷺ said:

“Women are the twin halves of men.” (Abu Dawud)

► **Women** are equal to men in their humanity. They are not the source of sin nor are they the reason Adam was expelled from Jannah (Heavenly Gardens).

► **Women** are equal to men in their individuality. They neither lose their names nor the names of their family upon marriage. They do not fade away and blend into the identity of men.

► **Women** are equal to men with regards to reward and punishment in this life as well as the next.<sup>33</sup>

► **Women** are equal to men in that Islam seeks to maintain and uphold their honor and chastity.

► **Women** are equal to men in that they have a right to inheritance, as do men.

► **Women** are equal to men in that they have full rights to do as they please with their own wealth.

- Women are equal to men with regards to reward and punishment in this life

- Women are equal to men in their right to receive an education and proper upbringing

▶ **Women** are equal to men with regards to the obligation of shouldering the responsibility of social reform.

▶ **Women** are equal to men in their right to receive an education and proper upbringing.

▶ **Woman** and man have an equal share of rights in matters pertaining to good rearing, proper teaching and caring. Islam assures that when applying these rights of women they would be put at a higher position.

▶ **Women** have the right to provisions from her husband for all her needs and more. If she's not married then she has the right to provisions from her brother(s). If she doesn't have brothers then the closest of kin to her.

▶ **A woman** has the right to keep all of her own money. She is not responsible for maintaining the family financially.

▶ **Women** have the right to get sexual satisfaction from her husband.

▶ **A woman** has the right to get custody of her children in case of divorce unless she is unable to raise them for a valid reason.

▶ **Women** have the right to re-marry after divorce or after becoming a widow.

The Prophet of Allah ﷺ said:

“Whoever has three daughters or three sisters, and fears Allah in their guardianship, will be together with me in Paradise like this.” He indicated this by joining index and second fingers together. (Ahmad and others)

## Islamic Perspective on Sexual Relations

Islam considers sexual relations an essential human need which need not be suppressed, rather satisfied in a proper manner. It is not something looked down upon disdainfully and a thing a person must refrain from.

Islam has set certain laws by which it is controlled and through which one can satisfy this need. One is not to satisfy this need in an animalistic or lustful uncontrolled manner; it should be satisfied through marriage.

The ultimate goal of marriage in Islam is to achieve psychological and emotional stability for both spouses. Allah says:

(They are Libas (i.e. body cover, or screen or Sakan [i.e. you enjoy the pleasure of living with them]) for you and you are the same for them.) (2:187)

Islam safeguards the individual and society by forbidding everything which excites the sexual desire for fear that a person would commit fornication or sodomy or rape.

This of course would result in the proliferation of illegitimate children who have no parents to raise them morally. They would then emerge in society as a group who harbor animosity and hate towards others. Also, diseases would spread throughout society.

- marriage in Islam is to achieve psychological and emotional stability for both spouses

Allah says:

(And come not near to the unlawful sexual intercourse. Verily it is a Fahishah [a great sin and an evil way that leads oneto Hell].) (17:32)

## Islam and Non-Muslims

Islam protects the blood, wealth and honor of non-Muslims who have a pact with an Islamic nation. They may not be oppressed nor transgressed against; they may not be deprived of their rights nor ill-treated in dealings.

Allah says:

(Allah does not forbid you from those who do not fight you because of religion and do not expel you from your homes from being righteous toward them and acting justly toward them. Indeed, Allah loves those who act justly). (60:8)

The Messenger of Allah, Muhammad ﷺ said:

“Indeed whoever oppresses one with whom we have a pact, deprives him of his rights, burdens him with more than he can bear, or takes something from him without his consent, then I will dispute with him on the Day of Requital.” He then pointed with his finger to his chest. “Indeed whoever kills one with whom we have a pact, who is under the responsibility of Allah and His Messenger, Allah will forbid him from smelling the fragrance of Jannah (Heavenly Gardens), and indeed

the fragrance of Jannah may be perceived from a distance of seventy years.” (Baihaqi)

The Messenger of Allah, Muhammad ﷺ said:

“My Lord has commanded me that we should not oppress the ones whom we have a pact with (ie non-Muslims who reside in the lands of the muslims) or anyone else.” (Baihaqi)

## Islam and Other Divine Religions

Islam deems it compulsory upon its followers to believe in the previous divine Messages and in all the Prophets and Messengers. Muslims must love them all, and respect them.

Allah says:

(And that was Our [conclusive] argument which We gave Abraham against his people. We raise by degrees whom We will. Indeed, your Lord is Wise and Knowing. And We gave to him [i.e. Abraham] Isaac and Jacob – all [of them] We guided. And Noah, We guided before; and among his descendants, David and Solomon and Job and Joseph and Moses and Aaron. Thus do We reward the doers of good. And Zechariah and John and Jesus and Elias – and all were of the righteous. And Ishmael and Elisha and Jonah and Lot – and all [of them] We preferred over the worlds. And [some] among their fathers and their descendants and their brothers – and We chose them and We guided them to a Straight Path. ) (6:83-87)

### What the Qur'an says about Moses

Allah says:

(And mention in the Book, Moses. Indeed, he was chosen, and he was a Messenger and a Prophet.) (19:51)

Allah says:

( O Moses, I have chosen you over the people with My messages and My words [to you]. So take what I have given you and be among the grateful.) (7:144)

Allah says:

(Then We gave Moses the Scripture, making complete [Our favor] upon the one who did good [i.e. Moses] and as a detailed explanation of all things and as guidance and mercy that perhaps [the matter of] the meeting with their Lord they would believe.) (6:154)

Allah says:

(And We certainly sent Moses with Our signs, [saying], “Bring out your people from darkness into the light and remind them of the days of Allah.” Indeed in that are signs for everyone patient and grateful.) (14:5)

## 02 What the Qur'an says about Jesus and his Mother, Mary, may Allah praise them.

Allah says:

(And [mention] when the angels said, "O Maryam (Mary), indeed Allah has chosen you and purified you and chosen you above the women of the worlds.) (3:42)

Allah says:

(Indeed the example of Jesus to Allah is like that of Adam. He created him from dust; then He said to him, "Be," and he was.) (3:59)

Allah says:

(O People of the Scripture do not commit excess in your religion or say about Allah except the truth. The Messiah, Jesus, the son of Mary, was but a messenger of Allah and His word which He directed to Mary and a soul [created at a command] from Him. So believe in Allah and His messengers. And do not say, "Three"; desist – it is better for you. Indeed, Allah is but one God. Exalted is He above having a son. To Him belongs whatever is in the heavens and whatever is on the earth. And sufficient is Allah as Disposer of affairs.) (4:171)

## Muslims love Isa (Jesus) and his Mother

Isa peace be upon him was explicitly mentioned in the Holy Qur'an on sixteen different occasions. On one occasion Allah the Exalted said in Surat Al-Maidah, verse 110:

((Remember) when Allah will say (on the day of resurrection). "O Isa (Jesus), son of Mary! Remember my favor to you and to your mother when I supported your with ruhu-lqudus [Jibrail (Gabriel)] so that you spoke to the people in the cradle and in maturity; and when I taught you writing, Al-Hikmah (the power of understanding), the Torah and the Gospel; and when you made out of the clay, a figure like that of a bird, by my permission, and you breathed into it, and it became a bird by my permission, and you healed those born blind, and the lepers by my permission, and when you brought forth the dead by my permission; and when I restrained the children of Israel from you (when they resolved to kill you) as you came unto them with clear proofs and the disbelievers among them said: "This is nothing but evident magic")

On the other hand, Prophet Mohammad (peace be upon him) was explicitly mentioned in the Holy Qur'an four times while the Virgin Mary (peace be upon her), the mother of Jesus was mentioned eight times and has a complete Sura (chapter) named after her.

On one occasion Allah the All Mighty said in Surat Al-Imran, verse 145:

((Remember) when the angles said: " Oh Mary! Verily, Allah gives you the glad tidings of a word ["Be!"- and he was! i.e. Jesus the son of Mary] From him his name will be the Messiah Jesus the son of Mary, held in honor in this world and in the hereafter, and will be one of those who is near to Allah.)

As a family they have been mentioned in the Holy Qur'an three times and they have been privileged by having a complete Sura (chapter) named after them (Ali Imran) which is imprinted in the hearts and minds of the believers forever.

## Islam and Jihad

One of the most misunderstood terms in Islam is ‘Jihad’. Unfortunately, the word ‘jihad’ has been misused and as a result many people associate it with war and terrorism.

Linguistically, Jihad means striving for good or against evil. Jihad is expressed in many ways but generally it means resisting and opposing the self from abase desires, oppression, persecution or standing up to a tyrant.

The prophet Mohamed ﷺ said: “the person who performs jihad is one who obeys Allah in what he has prescribed as permissible or what he has made impermissible. (Ibn Habaan)

The following are a few ways that jihad may be expressed:

- ▶ Informing non Muslims of the content of Islam; making it clear to them by citing evidences from the Holly Quran or supporting explanations along with proofs while reasoning when necessary and listening with patience to their criticisms or accusations is a form of jihad.

Allah says: (So do not obey the disbelievers, and strive against them with the Qur’an a great striving.) (25:52)

- ▶ Commanding the good and forbidding the evil are the tradition of the prophets and their followers. The practice of such morals under their prescribed avenues is considered a form of jihad. The prophet ﷺ said: “all the prophets that were sent by Allah before me have followers who faithfully follow them. Then a generation of people will follow them, they will speak of morals that they don’t adhere to and they will do acts that they are not instructed to do. Whoever of you is commanded by authority to rectify their ill doing by his hand, verbally or by condemning that in his heart is a believer who is conducting a form of jihad. Applying other means of rectification like passing by without expressing none of the above is considered a complete lack of belief.” (Muslim)

- Speaking out against an unjust ruler considered a form of jihad

- Seeking knowledge a good deed is considered in a state of Jihad

▶ Speaking out against an unjust ruler; the Prophet Muhammad ﷺ said: “the best jihad is speaking truthfully to an unjust ruler.” (Abou dawood)

▶ Treating parents respectfully; a man came to the Prophet ﷺ seeking permission to join one of the battles. The Prophet ﷺ asked the man, “Are your parents alive?” The man said, ‘Yes.’ The Prophet ﷺ then said, “Make your jihad by taking care-of them.”

▶ Seeking knowledge; the prophet Mohamed ﷺ said: “the person who comes to my mosque intending to learn or teach a good deed is considered in a state of Jihad. Whoever comes to my mosque for motives other than that will be like a person looking at someone else’s possession, meaning he is not earning a deed.” (Ibn Majaa)

▶ Traveling for the purpose of gaining knowledge is a form of Jihad.

The Prophet Muhammad ﷺ said that, “He who travels in search of knowledge is considered on the path of God until he returns.” (Tirmidi)

▶ Performing acts of worship; The Prophet ﷺ said that, “Performing a voluntary pilgrimage, or lesser pilgrimage is jihad.” (I.e. a struggle) (Ibn Majaa)

He also said: “Shall I show you what act forgives sins and increases good deeds? Making ablution in difficult circumstances (I.e. cold weather), frequently walking to the mosque and waiting in the mosque from prayer to prayer.” (Muslim)

▶ The Prophet ﷺ told his companions that the greatest jihad is the jihad (struggle) against the ego.

When Muslims are buying or selling they are encouraged to

abide by all the leniency and gentleness of the Islam in their daily routine. Muslims should not make others suffer increase in price for the sake of their own ego over the interest of buyers or sellers. The prophet Mohamed ﷺ saw a man selling food at a lower price than other merchants. He said to the man, “do you sell in our market offering a lower price than our prices?.” The man said yes. He said: “is that because of your belief and trust that Allah will reward you more (As a result of making things affordable to buyers).” The man said yes. The prophet ﷺ said to the man then, “expect the greatest reward from Allah because people who bring things to our market to sell honestly, they are like people who are performing jihad and people who monopolize goods in order to hike prices are considered to us as non-believers in Allah’s book.” (Mustadrak al-Hakim)

- ▶ Muslims who favor moral uprightness and safe guarding a trust, whether by their employers or by their society are considered performing jihad. The prophet Mohamed ﷺ said: “If a Muslim is employed he should take his position such as that of a person who honestly gives what is required of him and fairly receives what is his. Such as that of a person who honestly gives what is his. Such a person is considered in the path of Jihad until he finishes his assignment by returning to his home.”(Tabari)

Jihad can also denote military effort. This is seen as a last attempt to end the violation of rights of others or any act of aggression. Sometimes the sword of justice is necessary to prevent the sword of tyranny as is the case with the police. Even during times of war Muslims are commanded to uphold morality. Acts of torture are strictly forbidden.

Harming civilians, women, children and the elderly during times of war are also strictly forbidden. Only a governmental authority can declare a legitimate jihad, not individuals.

The Messenger of God said: “Fight in the name of God, and for the cause of God... do not break treaties, do not mutilate, and do not kill young children.” (Muslim)

Islam also prohibits the destroying or desecrating of places of worship, killing or hurting of animals and destroying trees.

At the time of fighting between Muslims and non-Muslims, Abu Bakr, the first Caliph after the Prophet ﷺ, would advise his commanders saying:

“I command you ten things. Learn them by heart: Don’t betray, defraud (by stealing the spoils of war), or break treaties. Don’t mutilate, kill women, young children, or the elderly. Do not uproot or burn palm trees. Do not cut down fruitful trees, slaughter sheep, cows or camels except for eating. You will come across people secluded in monasteries, so leave them and what they are devoted to.” (Tabari, Vol.3)

Allah says: (Take not life, which Allah hath made sacred, except by way of justice and law: Thus doth he command you, that ye may learn wisdom. ) (6:151)

## Islam is the Faith of Peace

Islam means to submit to Allaah, adhere to obeying Him, and be free from worshipping any others besides Allaah. There is no good except that which Islam ordered for it to be done, and there is no evil except that which it prohibited. Applying Islam guarantees everyone to be able to live in security and peace in light of its system, which safeguards rights for all. Allaah said: (Say, “Come, I will recite what your Lord has prohibited to you. He commands that you not associate anything with Him, and to parents, good treatment, and do not kill your children out of poverty; We will provide for you and them; and do not approach immoralities- what is apparent of them and what is concealed; and do not kill the soul which Allah has forbidden to be killed except by legal right. This has He instructed you that you may use reason;” and do not approach the orphan’s property except in a way that is best until he reaches maturity; and give full measure and weight in justice. We do not charge any soul except with that within its capacity; and when you speak be just, even if it concerns a near relative; and the Covenant of Allah fulfill. This has He instructed you that you may remember.) (6:151-152)

Allah also said:

(Indeed, Allah orders justice and good conduct and giving to relatives and forbids immorality and bad conduct and oppression. He admonishes you that perhaps you will be reminded.) (16: 90)

Hence, the Faith of Islam is a comprehensive Faith of peace in all meanings of this word. This applies to the internal level of Muslim society as Allah said:

(And those who harm believing men and believing women for something other than what they have earned have certainly born upon themselves a slander and manifest sin.) (33: 58)

The one upon whom be Allah's Blessing and Peace said:

"A Muslim is a person whose tongue and hand is safeguarded against, and an emigrant is a person who has left that which Allaah prohibited!" (Agreed upon)

He also said:

"A believer is a person whom people trust!"

Islam also provides peace on an international level established through friendly relationships that are founded on security, stability and the foundations of Islam. Moreover, a Muslim society does not transgress against another society, especially those that are sincere in Faith, nor set up enmity against its adherents. According to the words of Allah:

(O you who have believed, enter into Islam completely and perfectly and do not follow the footsteps of Shaytaan. Indeed, he is to you a clear enemy.) (2: 208)

The Faith of Islam enjoins justice and non-oppression, even with those who set up enmity against them. Allah said:

(O you who have believed, be persistently standing firm for Allah, witnesses in Justice, and do not let the hatred of a people prevent you from being just. Be just; that is nearer to Righteousness; and fear Allah; indeed, Allah is Acquainted with what you do.) (5: 8)

► As-Salaam, The Peaceful, one of the All Praised's Names has said:  
 (He is Allah, other than whom there is no deity, the Sovereign, the Pure, the Perfection, the Bestower of Faith, the Overseer, the Exalted in Might, the Compeller, the Superior. Exalted is Allah above whatever they associate with Him.) (59: 23)

- 
- As-salamu alaykum is an Arabic greeting. It translates to "the peace be upon you (plural)", ( May Allah's peace , mercy and blessing be upon you ) but is often used as a greeting and parting and is considered the equivalent to "hello" in English.

السلام عليكم

- ▶ As-Salam, is one of the names of Paradise. Allah the Most High said:  
(For them will be the Home of Peace with their Lord, and He will be their protecting Friend because of what they used to do.) (6: 127)
- ▶ As-Salam is the greeting of the people of Paradise. Allah said:  
(Their greeting the Day they meet Him will be, 'Peace,' and He has prepared for them a noble Reward.) (33: 44)
- ▶ As-Salam is also the greeting of Muslims among themselves, As-Salaamu 'Alaykum! It is a greeting which adds tranquility, calmness and ease for the greeting and the greeted person. This is because of the expression of security and safety within this greeting. This, the Prophet ﷺ established as one of the perfecting actions of a person's belief. He said:  
"You will not enter jannah until you believe, and you will not believe until you love each other. Shall I not guide you towards a thing, that if you do, you would love each other? Spread the Salaam! greeting among you!" (Reported by Muslim)

The one, upon whom be Allah's Blessing and Peace, established that this was one of the best actions. This is because the greeting brings hearts closer and softens them when it is given or heard. It also removes differences and hatred. When the Prophet was asked, 'Which part of Islam is best?,' he replied, "To feed people and give the Salam greeting to those you know and those you do not know!" (Bukhari and Muslim)

Hence, the Faith of Islam brought regulations and legislation at times of war, marriage, economy, politics, worship, etc. It was for an ideal, virtuous society to implement and regulate a Muslim's relationship with his/her Lord, society and surrounding world, whether the human world or surrounding environment. The whole of humanity is unable to produce the like of Islam. A Faith of this perfection and comprehensiveness is deserving of being embraced, invited towards and respected.

## 14

## Islam and Society

Islam commands that one's environment must be cared for and protected and forbids polluting it in any way. It does so through the following means:

► It encourages planting beneficial plants and trees. The Messenger of Allah, Muhammad ﷺ said:  
 “No Muslim plants a tree or crop, and its fruit is eaten by birds, people, or animals, except that it will be regarded as charity for him.” (Bukhari)

► It encourages the removal of anything that may inflict harm. The Messenger of Islam ﷺ said:  
 “Removing harm from the path is charity.” (Bukhari)

► It encourages quarantining those afflicted with diseases and epidemics in order to prevent its spread to other societies and protecting the lives of others. The Messenger of Allah ﷺ said:  
 “If you hear of a plague in a certain location, then do not enter it, and if it strikes a place where you are, then do not leave it.” (Bukhari)

► It forbids random killing of animals and birds. The Messenger of Allah, Muhammad ﷺ said:  
 “Whoever kills a sparrow for no reason, it will cry to Allah on the Day of Requitah, ‘O Allah, so and so killed me without reason or benefit!’ ” (Nasa’i)

► It forbids polluting the society in any way. The Messenger of Allah, Muhammad ﷺ said:  
 “Fear two things for which people curse others for.” [His Companions] asked: “What are the two things for which people will curse others for, O Messenger of Allah?” He replied: “That he relieves himself in places where people walk or where they seek shade.” (Muslim)

## Islam and Cleanliness

Islam is a religion of cleanliness.

Allah says:

(O children of Adam, take your adornment at every Masjid, and eat and drink, but do not waste: verily He does not love the wasteful.) (7:31)

It is a religion of purity. Allah says:

(Indeed, Allah loves those who are constantly repentant and loves those who purify themselves.) (2:222)

Purity is a condition for prayer to be regarded as valid, and prayer is an act of worship which a Muslim performs at least five times throughout his daily routine. Islam also requires that one wash fully after ejaculation or sexual intercourse, and highly encourages washing fully before performing those types of worship which are manifest symbols of Islam, such as the Friday Prayer and the Greater and Lesser Pilgrimage to Makkah.

Allah says in the Glorious Qur'an:

(O you who believe! When you rise up for prayer, wash your faces, and your hands up to the elbows, and wipe your heads (with wet hands), and (wash) your feet up to the ankles. And if you are in a state of major ritual impurity [Janaaba], purify yourselves (by taking a bath). And if you are sick or on a journey, or one of you comes from the answering of call of nature, or you have had contact with women, and you find no water, then go to clean earth and wipe your faces and hands with some of it. Allah does not want to place you in difficulty, but He wants to purify you and to perfect His grace upon you that you may give thanks.) (5:6)

Islam also encourages that one wash his hands prior and subsequent to meals.

The Messenger of Allah, Muhammad ﷺ said:

“Food is blessed when one washes his hands before and after it.” (Tirmidhi)

- Speaking out against an unjust ruler considered a form of jihad

It encourages that one keep his mouth and teeth clean. The Messenger of Allah ﷺ said:

“Had I not found it difficult for my followers, I would have ordered them to cleanse their teeth before every prayer.” (Bukhari)

It encourages that one cleanse and purify those places that may become a breeding ground for germs and filth. The Messenger of Allah, Muhammad ﷺ said:

“There are five acts which are from the innate nature with which Allah created humans: circumcision, removing the pubic hair, plucking the hair of the armpits, shortening the moustache, and clipping the nails.” (Bukhari)

- **Salāt** is one of the “five pillars” of the faith of Islam and an obligatory religious duty for every Muslim. It is a physical, mental and spiritual act of worship that is observed five times every day at prescribed times.

## Islam and Knowledge

The religion of Islam encourages all people to seek and increase their knowledge. It disparages and warns against ignorance. Allah says: (Allah will exalt in degree those of you who believe and those who have been granted knowledge.) (58:11)

It regards striving to seek, learn, and teach knowledge as a means which leads to Jannah. The Messenger of Allah, Muhammad ﷺ said:

“Whoever seeks a path in search of knowledge, Allah would make easy for him a path leading to Jannah.” (Abu Dawud)

He forbade that knowledge be concealed, as it is an obligation for each person to seek it. The Messenger of Allah, Muhammad ﷺ said:

“Whoever conceals knowledge would be muzzled on the Day of Resurrection with a muzzle of Fire.” (Ibn Hibbaan)

Islam regards scholars with high esteem and demands that they be paid their due respect. The Messenger of Allah, Muhammad ﷺ said:

“He is not from my followers, he who does not respect his elders, who does not show mercy to the young, and does not give due right to a scholar.” (Ahmad)

The Messenger, Muhammad ﷺ informed us of the status of the scholar in his sayings:

“The excellence of a scholar over a layman is like my excellence over the least of you.” (Tirmidhi)

## The Effect of Islamic Civilization on Modern Science

The one who contemplates the reason modern science and technology have taken giant steps and advanced to the present state would certainly agree that it is due to Islamic civilization which transmitted and introduced vast amounts of knowledge and produced many scholars.

**C.H. Haskins<sup>(1)</sup>** said: “The broad fact remains that the Arabs of Spain were the principal source of the new learning for Western Europe.”

They are the ones who placed the fundamentals from which modern civilization advanced. Whoever reviews the ‘Dictionary of Technical Terms for Aerospace’<sup>(2)</sup> would certainly conclude that sixty percent of the known stars are given names that are derived from Arabic.

The books and works of early Muslim scholars were the main resource texts which the West benefited from, especially the Europeans who used these works during the Renaissance period. Many of these texts were used in European universities.

**Marquis of Dufferin and Ava** said:

“It is to Mussulman science, to Mussulman art, and to Mussulman literature that Europe has been in a great measure indebted for its extrication from the darkness of the Middle Ages.”<sup>(3)</sup>

<sup>(1)</sup> **C.H. Haskins**, Charles Homer, 1870–1937, American historian, an authority on medieval history

### J.H. Denison said:

“In the fifth and sixth centuries the civilized world stood on the verge of chaos. The old emotional cultures that had made civilization possible, since they had given to men a sense of unity and of reverence for their rulers, had broken down and nothing had been found adequate to take their place. It seemed then the great civilization which it had taken four thousand years to construct was on the verge of disintegration, and that mankind was likely to return to that condition of barbarism where every tribe and sect was against the next, and law and order was unknown. The old tribal sanctions had lost their power. The new sanctions created by Christianity were working division and destruction instead of unity and order. It was a time fraught with tragedy. Civilization, like a gigantic tree whose foliage had overarched the world and whose branches had borne the golden fruits of art and science and literature, stood tottering... rotted to the core. Was there any emotional culture that could be brought in to gather mankind once more into unity and to save civilization? It was among these people that the man, Muhammad ﷺ, was born who was to unite the whole known world of the east and south.”<sup>(1)</sup>

### Illuminating Europe's Dark Ages

- Scientific knowledge that originated in India, China and the Hellenistic world was sought out by Muslim scholars and then translated, refined, synthesized and augmented at different centers of learning in the Islamic world from where the knowledge spread to Western Europe. (History of Medicine, Arab roots of European Medicine, David W. Tschanz, MSPH, PhD. Also see: [www.hmc.org.qa/hmc/heartviews/H-V-v420%N29/](http://www.hmc.org.qa/hmc/heartviews/H-V-v420%N29/). htm). In addition, Muslim scholars also founded some unprecedented disciplines.

Muslims had advanced in all technical, scientific and intellectual fields. Here we will mention a few of the outstanding scholars in various fields.

► **Al-Khawarizmi (780-850CE)** was a great scholar in the fields of mathematics, algebra, logarithms and geometry. He was perhaps one of the greatest mathematicians who ever lived. In fact, he was the founder of several branches and basic concepts of mathematics. He was also the founder of Algebra.

► **Al-Biruni (973–1050AD)** was a great scholar in many fields. He wrote on topics ranging from astronomy to mathematics, mathematical geography to mechanics, pharmacology and history. Al-Biruni discussed the theory of the earth rotating on its own axis six hundred years before Galileo!

The German Orientalist E. Sachau said about Al-Biruni:  
“He was the greatest intellectual known to man.”

As Muslims we say that the greatest intellectual known to man is our Prophet Muhammad ﷺ.

In the field of medicine and pharmacy, Muslim scholars left behind a wealth of knowledge in their works, which were used to advance modern day medicine. Among these scholars were:

► **Ibn Rushd (Averroes 1126-1198 CE)** was an Andalusian (Spanish) philosopher and physician, a master of philosophy and Islamic law, mathematics and medicine.

• Ibn Rushd

► **Ibn An-Nafees (1213-1288 CE)** was a physician who was mostly famous for being the first to describe the pulmonary circulation of the blood. He discovered blood circulation before the Englishman Harvey and the Spaniard Michael Servetus by hundreds of years.

• Ibn An-Nafees

► **Ammaar son of Ali Al-Mosili son of Eesa Al-Kahhaal** was highly skilled in ophthalmology. He invented specialized instruments used in operations, such as the “injection syringe”, a hollow needle.

► **Al-Hasan son of Al-Haitham (Alhazen 965-1040 AH)** was

- Blood circulation and the inner organs of the human body. An image taken from a book of an ancient Muslim doctor.

- The Astrolabe: An important device invented by Muslims for navigation. The points of the curved spikes on the front rete plate, mark the positions of the brightest stars. The name of each star being labeled at the base of each spike. The back plate, or mater is engraved with projected coordinate lines. From the Whipple Museum of the History of Science in Cambridge

a great mathematician. He was a pioneer in optics, engineering and astronomy. According to Giambattista della Porta, Al-Hasan was the first to explain the apparent increase in the size of the moon and sun when near the horizon. His seven volume treatise on optics *Kitab Al-Manadhir* (Book of Optics) is possibly the earliest work to use the scientific method. He used the results of experiments to test theories.

▶ **Al-Mansoori** and **Abu Bakr Ar-Razi** were renowned, versatile physicians. They made fundamental and enduring contributions to the fields of medicine and philosophy.

• Abu Bakr Ar-Razi

▶ **Muwaffaq Al-Baghdadi** and **Abul-Qasim Az-Zahrawi** were renowned in dental practices. They wrote books concerning this, and put illustrative pictures of the tools used in surgical operations and how to use the tools.

• Az-Zahrawi

In the field of geography and geology many notable scholars can be mentioned, among whom are:

▶ **Shareef Al-Idrisi** (1100-1165 AH) was a cartographer, geographer and traveler. He was renowned for his excellent maps of the world. He also invented navigational instruments.

• Shareef Al-Idrisi

There are many Muslim scholars who participated and took part in advancing civilization. Whoever wants to know more, should review books that are written specifically on this topic. Numerous times, works of research written by Muslims were plagiarized and wrongfully attributed to others.

**Major Arthur Glyn Leonard said:**

“Do not we, who now consider ourselves on the topmost pinnacle ever reached by culture and civilization, recognize that, had it not been for the high culture, the civilization and intellectual, as the social splendors of the Arabs and soundness of their system, Europe would to this day have remained sunk in the darkness of ignorance?”<sup>(1)</sup>

## The Virtues of Islamic Civilization

- ▶ Seeking knowledge is a religious duty, which Islam encourages Muslims to fulfill.
- ▶ Muslim scholars in the past used their knowledge to strengthen people’s belief in contrast to the scholars of this age, who use their knowledge to weaken people’s belief.
- ▶ Muslim scholars in the past used their knowledge to serve mankind, in contrast to most of the scholars today who use their knowledge for exploitative and selfish ends.

Scientists during this era invented the atom and hydrogen bombs and other weapons of mass destruction; thereafter they prevented others from owning these weapons in an attempt to control and exploit the riches of the world.

- ▶ Muslim scholars of the past spread their knowledge so that people could benefit from it, in contrast to others who may withhold knowledge for themselves or for their own country and prevent others from acquiring it.
- ▶ Muslim scholars of the past aimed to attain the Mercy of Allah and His reward, in contrast to the scholars of today who try their best to benefit materialistically from their discoveries.

• Eye anatomy - An image taken from a book of an ancient Muslim doctor

## Scientific Points in a Few Verses of the Qur'an

- Solar System Montage

Allah says:

(Verily, in the creation of the heavens and the earth, and in the alternation of night and day, and the ships which sail through the sea with that which is of use to mankind, and the water (rain) which Allah sends down from the sky and makes the earth alive therewith after its death, and the moving (living) creatures of all kinds that He has scattered therein, and in the veering of winds and clouds which are held between the sky and the earth, are indeed Ayat (proofs, evidences, signs) for people of understanding.) (2:164)

- This picture depicts the galaxy containing our solar system

The Qur'an was revealed to Muhammad ﷺ who was unlettered; he could neither read nor write. His people were generally unlettered as well. Therefore, how can a man bring forth a Scripture which stunned the most eloquent of people!

Allah says:

(Say, "If mankind and the jinn were to be gathered in order to produce the like of this Qur'an, they could not produce the like of it, even if they were to each other assistants.") (17:88)

The Prophet ﷺ and many of his companions were destitute, and he would recite to them verses from the Qur'an which have mention of scientific facts. Over 1400 years after the Qur'an was revealed, modern science discovered these very facts with advanced equipment!

**Thomas Carlyle said:**

"A false man found a religion? Why, a false man cannot build a brick house! If he does not know and follow truly the properties of mortar, burnt clay and what else he works in, it is no house that he makes, but a rubbish-heap. It will not stand for twelve centuries, to lodge a hundred and eighty million; it will fall straightway."<sup>(1)</sup>

<sup>(1)</sup> **Thomas Carlyle.**  
A Scottish writer, essayist,  
historian and teacher during  
the Victorian era.

## The Qur'an and the Beginning of the World

Allah says:

(Allah (alone) originates the creation, then He will repeat it, then to Him you will be returned.) (30:11)

Allah clearly states in this verse that He is the One Who created and brought into existence all creatures in this universe from nothing. This is stated in the Qur'an, which is divine revelation from Allah. Allah describes the beginning of the universe saying:

(The Originator of the heavens and the earth: and when He decrees a matter, He only says to it, "Be," and it is.) (2:117)

Allah informs us in this verse that the universe was created from nothing, all that took place before its creation is from the knowledge of the unseen world,

which only Allah knows. Human intellect is incapable of realizing and grasping what the substance matter of the first creation was, for Allah did not inform us of this knowledge. Humans can only produce hypothesis and theories concerning ecological systems.

- This is an actual picture of a star that has formed from interstellar matter.

Allah says: (I did not make them witnesses of the creation of the heavens and the earth, nor of the creation of their own selves; and I would not have taken the misguiders as assistants.) (18:51)

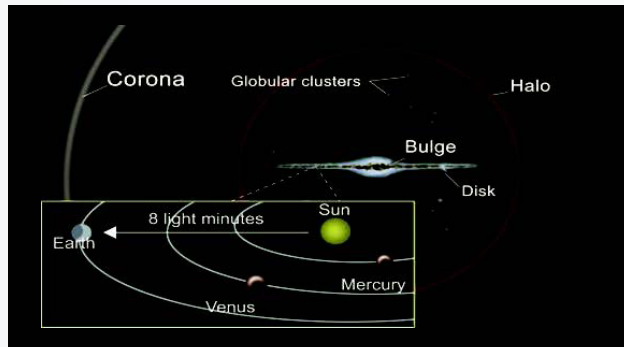

Allah says:

(Have those who disbelieved not considered that the heavens and the earth were one single entity, which We then parted asunder and made from water every living thing? Will they not, then, believe?) (21:30)

إِنَّا قَضَىٰ آمْرًا إِنَّمَا نَقُولُ فَيَكُونُ ۚ

- when He decrees a matter, He only says to it, "Be," and it is (2:117)

This verse makes unmistakable reference to the fact that Allah created the universe from a single entity, and He is All-Capable over all things. Allah then ordered this 'single entity' to split,

- This picture shows that the universe is expanding

which it did, and turned into a cloud of smoke. From this cloud of smoke Allah created the heavens and earth. This is mentioned in the words of Allah: (Say, “Do you indeed disbelieve in He who created the earth in two days and attribute to Him equals? “That is the Lord of the Worlds. And He placed on it [i.e., the earth] firmly set mountains over its surface, and He blessed it and determined therein its [creatures’] sustenance in four days without distinction – for [the information of] those who ask. Then He directed Himself to the heaven while it was smoke and to it and the earth, “Come [into being], willingly or by compulsion.” They said, “We have come willingly.” And He completed them as seven heavens within two days and inspired [i.e. made known] in each heaven its command. And We adorned the nearest heaven with lights [i.e. stars for beauty] and as protection: such is the ordaining of the Almighty, the All-Knowing) (41:9-12)

Modern astrophysicists assert that the entire universe originated from one entity, the result of what is known today as the ‘Big Bang’.<sup>(1)</sup>

Allah says:

(Then He (rose over) the heavens while it was something like smoke, and said to it and to the earth: ‘Come both of you willingly or unwillingly.’ They said, ‘We come willingly.’) (41:11)

This verse affirms that the sky, during its early stages was like smoke; this is also affirmed by modern science.

**James H. Jeans said:** “We have found that, as Newton first conjectured, a chaotic mass of gas of approximately uniform density and of very great extent would be dynamically unstable; nuclei would tend to form in it, around which the whole of matter would ultimately condense.”<sup>(2)</sup>

<sup>(2)</sup> Thomas Carlyle, James H. Jeans, *Astronomy and Cosmology*, Sir James H. Jeans, p.15.

<sup>(1)</sup> G. Lemaître (1927). «Un Univers homogène de masse constante et de rayon croissant rendant compte de la vitesse radiale des nébuleuses extragalactiques.» *Annals of the Scientific Society of Brussels* 47A: 41. Translated in: (1931) «A homogeneous universe of constant mass and growing radius accounting for the radial velocity of extragalactic nebulae.» *Monthly Notices of the Royal Astronomical Society* 91: 483–490. *Astronomy and Cosmology*, Sir James H. Jeans, p.15.

## Qur'an on the Expansion of the Universe

The American astronomer Vesto M. Slipher (1875 - 1969)

Allah says: (And We have built the heavens with Our own Hands; and, verily, it is We who are steadily expanding it.) (51:47)

Allah says:

(On that Day We shall roll up the skies as written scrolls are rolled up; [and] as We brought into being the first creation, so We shall bring it forth anew – a promise binding upon Us; for, behold, We are able to do [all things]!!) (21:104)

Allah says:

(On the day when this earth will be changed into another earth, as shall be the heavens and they will all appear before Allah, the One, the Most Supreme) (14:48)

These verses confirm that the universe we live in is continuously expanding in space. If we go back in time, we would find that the entire universe emerged from a primeval atom or cosmic egg. It then exploded by Allah's command and transformed into a cloud of smoke from which the earth and heavens were formed. The universe is continuously expanding in space and will finally stop expanding by Allah's command. Thereafter the universe will collapse upon itself and fuse once more into a primeval atom. The explosion and formation will once more occur, and a heaven, unlike our heaven, and an earth, unlike our earth, will be formed. At this stage, worldly life will come to an end, and life of the Hereafter will commence. All these stages are mentioned in the Qur'an. One finds that this topic which was discovered through modern science has been mentioned in the Qur'an which was revealed 1400 years ago! This alone affirms the fact that the Qur'an can only be the Words of Allah and that

The American astronomer Edwin Hubble (1889–1953)

(1) V. Slipher, paper presented to the American Astronomical Society (1915).

(2) Edwin Hubble (1929). «A relation between distance and radial velocity among extra-galactic nebulae.» Proc. Nat. Acad. Sci. 15: 168–173.

(3) Any of a class of particles, such as the photon, pion, or alpha particle, that has zero or integral spin and obeys statistical rules permitting any number of identical particles to occupy the same quantum state.

Muhammad ﷺ received divine revelation and taught people these facts at a time when no one knew these facts. These facts were not known to man except after many centuries.

Astronomers have discovered that the universe is in continuous motion, and that it is expanding. This was discovered by studying the galaxies and distant celestial bodies. The American astronomer Vesto M. Slipher, who studied the spectra of galaxies, noticed that the spectral lines of a few nearby systems were shifted toward longer wavelengths. This shift in wave-length showed that most galaxies were receding from the Milky Way at several hundred kilometers per second! <sup>(1)</sup>

The American astronomer Edwin Hubble confirmed that the universe was expanding and that the more remote the galaxy the higher was its recession velocity; and that its recession velocity was proportional to its distance.<sup>(2)</sup> With this we see that scholars in astronomy have affirmed that the universe is ever expanding. This expansion will continue until gravity loses its pull and the planets will spread out in the universe, which will result in the end of the world.

Allah says:

(When the sky breaks apart, and when the stars are scattered.) (82:1-2)

## Qur'an on Celestial Bodies

Allah says:

(Allah is He Who raised the heavens without any pillars that you can see.) (13:2)

Modern day studies of the universe affirm that there is great energy in matter, its components and celestial bodies. Allah can destroy it and recreate it. Scientists have discovered different forms of powerful energy which flow in the heavens and earth. These energies are:

- ▶ **Strong nuclear energy:** This energy holds subatomic particles together; which includes protons, electrons and neutrons.
- ▶ **Weak nucleon energy:** This nuclear energy causes certain forms of radioactive decay.<sup>(3)</sup>

- The Whirlpool Galaxy (also known as Messier 51, M51, or NGC 5194) is an interacting grand-design spiral galaxy located at a distance of approximately 23 million light years in the constellation.

- ▶ **Electromagnetic energy:** This is the energy which ties the atoms together within matter, and which also gives each its respective traits.
- ▶ **Gravity:** It is the weakest form of energy known to us, but in the long run, is a focal form of energy, since it keeps all the celestial bodies in their respective positions.<sup>(1)</sup>

Allah says:

(And it is He Who has created the night and the day and the sun and the moon – all of them floating through space (in their orbits).) (21:33)

Allah says:

(And the sun runs in a fixed course of for a term (appointed). That is the Decree of the All-Mighty, the All-Knowing. And the moon, for which We have determined phases [which it must traverse] till it becomes like an old dried curved date stalk. And neither may the sun overtake the moon, nor can the night usurp the time of the day. They all float, each in an orbit.) (36:38-40)

In these verses Allah states that the sun is traveling towards a certain direction. Previously, it was perceived that the sun was motionless. Modern day cosmologists and astronomers have affirmed that the sun moves in a certain direction. All planets in this solar system move, like satellites. The Earth's orbit is concentric to the orbits of the planets.

Allah says:

(By the heaven full of starry paths.) (51:7)

In Arabic the word 'Hubuk' (i.e. starry paths) has more than one meaning:

- ▶ **Perfection in creation:** Astronomers calculate that there are two hundred billion galaxies in the universe (known to man) and about seventy billion trillion stars.<sup>(2)</sup> Each galaxy varies in its size, shape, density, speed at which it is traveling on its axis,

<sup>(1)</sup> Dr. Zaghlool El-Naggar, As-Samaa (The Sky).

<sup>(2)</sup> For further information see: [http://www.esa.int/esaSC/SEM75BS1VED\\_extreme\\_0.html](http://www.esa.int/esaSC/SEM75BS1VED_extreme_0.html)

its distance from us, and the distance each is from the other, the stages it went through, its number of stars, and the life of each of their stars.

► It also refers to a thing which is perfectly combined and integrated. These awesome numbers of galaxies and stars in the known portion of the universe is only 10% of the entire universe. There must be a power which keeps it all together, otherwise it would collapse and fall into chaos. Far removed is Allah from every imperfection, Who said:

(Indeed, Allah holds the heavens and the earth, lest they deviate from their orbits. And if they should ever deviate from their orbits, no one could hold them [in place] after Him. Indeed, He is Forbearing and forgiving.) (35:41)

► It also refers to the orbits each celestial body floats in: among the amazing thing which has baffled scientists is the vast number of galaxies in the known portion of the universe. This proves that this universe is running in a perfect system.

Allah says: (It is He who made the sun a [source] of radiant light and the moon a light [reflected], and has determined for it phases so that you may know the number of years and to measure time. Allah has not created this except in truth. He details the signs for a people who know.) (10:5)

The perfect distinction made between light given off by a luminous, fiery body and light reflected from the sun by a dark, cold body (i.e. the moon), which is then reflected in a constant and steady manner (upon the earth) has been mentioned in the Qur'an over fourteen hundred years ago! This proves that Qur'an is Divine Revelation from Allah, Who is the Best Knower of that which He, alone, has created.

## Qur'an on Air Pressure

Allah says:

(And whomsoever Allah wills to guide, He opens his breast to Islam, and whomsoever He wills to send astray, He makes his breast closed and constricted, as if he is climbing up to the sky. Thus Allah puts the wrath on those who believe not.) (6:125)

It can be concluded from this verse that the more one ascends into the atmosphere the harder it is for him to breathe. This is due to the reduction in pressure and low oxygen levels. This matter cannot be proven by anyone unless the person ascends up into the sky! This fact was discovered only after humans learned how to fly and reach heights.

When a person ascends into the sky beyond eight kilometers above sea level he/she would encounter breathing problems due to the lack of oxygen and low air pressure. A problem frequently encountered is hypoxia, which is a low amount of oxygen reaching body tissues. Another problem one may encounter is dysbarism, which is a complex of symptoms resulting from exposure to excessively low or rapidly changing air pressure.<sup>(1)</sup> These two problems would interfere with the normal body functions; therefore, the difficulty in breathing at high elevations can be explained simply as steps taken by the body to protect itself.

## Qur'an on the Darkness and upper Levels of Space

Allah says: (And even if We had opened to them a gateway to heaven and they had ascended, on and on, up to it, they would surely say (in the evening): "Our eyes have been (as if) dazzled (we have not seen any angel or heaven). Nay, we are a people bewitched!") (15:14)

<sup>(1)</sup> See The Merck Manual, 18th Edition under 'altitude sickness'.

- This is a picture of the sun during an eclipse, which proves that the universe is engulfed in darkness.

- Illustrates the thinness of the day layer opposite to the sun with the thickness of two hundred kilometers. While the rest of the earth is observed in total

This similitude is amazing since it presents a universal fact which humans previously were ignorant of, and only discovered during the age of space exploration in the sixties. The entire universe is engulfed in darkness. Light visible on earth is observed for two hundred kilometers, beyond that, the sun appears as a blue disc. Darkness is to be witnessed in every direction, due to the rarity of water vapor and dust particles. Far removed is Allah from every imperfection. It is He Who informed us of this reality.

## 25 Qur'an on the Atom

Allah says:

(And nothing is hidden from your Lord (so much as) the weight of an atom on the earth or in the heaven. Nor (is there) what is less than that or what is greater than that but is (written) in a Clear Record.) (10:61)

In this beautiful verse Allah clarifies that nothing is hidden from Him in this universe, no matter how minute it may be. It was believed that the atom was the smallest entity in the universe. After it was split smaller entities were discovered having positive electrical properties, such as protons and negative electrical properties, such as electrons.

In 1939, the German scholars Hahn and Strassmann at the University of Berlin split a uranium atom. With further research, particles which are even more minute may be discovered.

Modern sciences have reached a high level of technical development and scientific advancement in various fields of life. The future still awaits further development. This process will continue until the day of Requital. The collective efforts of all humankind in fields of knowledge will never measure up to or even come close to Allah's Knowledge and Ability.

Allah the Exalted says:

(They ask you (O Muhammed) concerning the Ruh (Spirit of inspiration). Say :”The Ruh (the Spirit) is one of the things, the knowledge of which is only with my Lord. And of knowledge, you (mankind) have been given only a little.) (17:85)

The knowledge of Allah and his abilities are boundless and unmatched. Allah in this Quranic verse has laid out a simple explanation for us so that our minds will be able to recognize and absorb the huge difference between his knowledge and ours. Glory be to Allah!

## Qur'an on Human Embryonic Phases

Allah says regarding the stages the fetus goes through:

(And indeed We created man (Adam) out of an extract of clay (water and earth). Thereafter We made him (the offspring of Adam) as a Nutfah (mixed drops of the male and female sexual discharge) (and lodged it) in a safe lodging (womb of the woman). Then We made the Nutfah into a clot (a piece of thick coagulated blood), then We made the clot into a little lump of flesh, then We made out of that lump of flesh bones, then We clothed the bones with flesh, and then We brought it forth as another creation. So blessed be Allah, the Best of creators. After that, surely, you will die. Then [again], surely, you will be resurrected on the Day of Resurrection.) (23:12-14)

The stages a human passes through are:

- **Extract of Clay:** Adam the father of humankind, was created from clay. This verse does not agree with the theory of evolution which science disproves. This indicates that humans are a distinct creation. Humankind did not evolve from other species.

- **Mixed sperm:** In this stage male and female discharge mix in the womb, the result of which the egg may become fertilized or die by the will of Allah. If the egg becomes fertilized the first stages of creation would commence. Allah says: (Indeed, We created man from a sperm-drop mixture that We may try him; and We made him hearing and seeing.) (76:2)

If the sperm fails to fertilize the ovum, it is cast out of the womb along with it, but if it fertilizes the egg and creates a zygote, it clings to the side of the womb in the form of a blastula. If Allah wills that it clings to the womb, it moves onto the Alaqa stage (i.e. a leech like, suspending thing).

- Diagram illustrating fertilization, the procession of events beginning when the sperm contacts the secondary oocyte's plasma membrane and ending with the intermingling of maternal and paternal chromosomes at metaphase of the first mitotic division of the zygote. A secondary oocyte surrounded by several sperms, two of which have penetrated the corona radiata. (Taken from Dr. Keith Moore, *The Developing Human*, pg. 34 – 7th edition)

Allah says:

(O people, if you should be in doubt about the Resurrection, then [consider that] indeed, We created you from dust, then from a sperm-drop, then from a clinging clot, and then from a lump of flesh, formed and unformed – that We may show you. And We settle in the wombs whom We will for a specified term, then We bring you out as a child, and then [We develop you] that you may reach your [time of] maturity. And among you is he who is taken in [early] death, and among you is he who is returned to the most decrepit [old] age so that he knows, after [once having] knowledge, nothing. And you see the earth barren, but when We send down upon it rain, it quivers and swells and grows [something] of every beautiful kind.) (22:5)

- beginning when the sperm contacts the secondary oocyte's plasma membrane and ending with the intermingling of maternal and paternal chromosomes at metaphase of the first mitotic division of the zygote. A, secondary oocyte surrounded by several sperms, two of which have penetrated the corona radiate.

► **Blood Clot/Clinging Thing:** It is described as such, since it clings to the womb; in a manner similar to a leech which feeds off the blood of other creatures.

- Lateral view of an embryo (24 to 25 days). B. Drawings illustrating the similarities between a leech and a human embryo at the 'Alaqah' stage. (Taken from Dr. Keith Moore, *The Developing Human*, pg. 71-7th edition)

- Diagram of the primordial cardiovascular system in an embryo of about 21 days, viewed from the left side. Observe the transitory stage of paired symmetrical vessels. (Keith Moore). Each heart tube continues dorsally into a dorsal aorta that passes caudally. The external appearance of the embryo and its sacs is similar to that of a blood clot, due to the presence of relatively large amounts of blood present in the embryo.

- Fertilisation: Fertilization occurs when genetic material from a spermatozoon fuses with that of the ovum. In humans, fertilisation occurs in the distal third of the uterine tube (fallopian tube).

- Section of an implanted embryo (about 21 days). In this diagram we can see the suspension of an embryo during the 'Alaqaḥ' stage in the womb of the mother.

- Indeed, We created man from a sperm-drop mixture that We may try him (76:2)

إِنَّا خَلَقْنَا الْإِنْسَانَ مِنْ نَضِيفَةٍ

- **Chewed substance:** It is described as such since the embryo is similar in appearance to a chewed substance.

- Macrophotograph of a stage 13, 4 12/ week human embryo. (Keith Moore) Actual size 4.5 mm

Gum

- Figure: Look at the similarities between a piece of chewed gum and an actual photo of an embryo. How is it possible that an unlettered man give such explicit details on the embryo? Indeed it is but a revelation from God!
- The embryo in this stage is similar in appearance to a chewed substance, because the somites at the back of the embryo somewhat resemble teeth marks in a chewed substance.

► **Formation of bones.**

► **Covering of bones with flesh.**

► **Development of the embryo into a different form,** wherein the proportioning of the body takes place and life is breathed into it.

- Drawing of a sagittal section of a gravid uterus at 4 weeks showing the relation of the fetal membranes to each other and to the deciduas and embryo.

The human embryo goes through a number of stages within three dark-nesses, as Allah says:

(He created you (all) from a single person (Adam); then made from him his wife [Hawwa' (Eve)]. And He has sent down for you of cattle eight pairs (of the sheep, two, male and female; of the goats, two, male and female; of the oxen, two, male and female; and of the camels, two, male and female). He creates you in the wombs of your mothers, creation after creation in three veils of darkness, such is Allah your Lord. His is the kingdom, Lâ ilâha illa

Huwa (none has the right to be worshipped but He). How then are you turned away?) (39:6)

This verse states that the embryo is covered in three coverings, referred to as “darknesses” in this verse. Water, air, light and heat cannot penetrate these coverings. Nor can they be seen with the naked eye.

**Dr. Maurice Bucaille<sup>(1)</sup>** said: ‘Modern interpreters of the Qur’an see in this verse the three anatomical layers that protect the infant during gestation: the abdominal wall, the uterus itself, and the surroundings of the fetus (placenta, embryonic membranes, amniotic fluid).’<sup>(2)</sup>

<sup>(1)</sup> **Maurice Bucaille** He was the chief of the surgical clinic at the University of Paris.

<sup>(2)</sup> The Bible, The Qur’an and Science.

The embryo is also placed in a safe place. Allah says:

(Did We not create you from a liquid disdained? And We placed it in a firm lodging [i.e. the womb] for a known extent [determined by gestation]. And We determined [it], and excellent [are We] to determine.) (77:20-23)

**Dr. Gary Miller:**<sup>(3)</sup> ‘A reporter asked Professor **Keith Moore:**<sup>(4)</sup> “Don’t you think that maybe the Arabs might have known about these things - the description of the embryo, its appearance and how it changes and grows? Maybe they were not scientists, but maybe they did some crude dissections on their own - carved up people and examined these things.”

The professor immediately pointed out to him that he [i.e., the reporter] had missed a very important point. All of the slides of the embryo that had been shown and had been projected in the film had come from pictures taken through a microscope. He said, “It does not matter if someone had tried to discover embryology fourteen centuries ago, they could not have seen it!”

<sup>(3)</sup> **Abdul-Ahad Omar** is a Canadian Muslim. He is notable for being a former Christian theologian and minister who converted to Islam.

<sup>(4)</sup> **Keith Moore** He is the world-renowned embryologist. He was the former president of the Canadian Association of Anatomists, Department of Anatomy and Cell Biology, University of Toronto.

All of the descriptions in the Qur’an of the appearance of the embryo are of the organism when it is still too small to see with the naked eye. Therefore, one needs a microscope to see it. Since such a device had only been around for little more than two hundred years, Dr. Moore taunted: “Maybe fourteen centuries ago someone secretly had a microscope and did this research, making no mistakes anywhere. Then he somehow taught Muhammad and convinced him to put this information in his book. Then he destroyed his equipment and kept it a secret forever. Do you believe that? You really should not unless you bring some proof because it is such a ridiculous theory.”

When he was asked: “How do you explain this information in the Qur’an?” Dr. Moore’s reply was: “It could only have been divinely revealed!”

**Dr. Gerald C. Goeringer**<sup>(5)</sup> said: “In most, if not all, instances, this description antedates by many centuries the recording of the various stages of human embryonic and fetal development recorded in the traditional scientific literature.”

<sup>(5)</sup> Dr. Gerald C. Goeringer is course director and associate professor of Medical Embryology at the Department of Cell Biology, School of Medicine, Georgetown University, Washington, DC, USA.

Dr. Gerald C. Goeringer

## What is mentioned in the Qur'an about the Oceans

### Qur'an on the Barrier Between the Seas

Allah says:

(And it is He Who has let free the two seas (kinds of water): this is palatable and sweet, and that is salty and bitter; and He has set a barrier and a complete partition between them.(25:53))

The fact that the waters of the oceans do not mix with each other has only been discovered lately by oceanographers. This is due to the physical force called “surface tension”;<sup>(1)</sup> therefore, waters of neighboring seas do not mix. It is caused by the difference in the density of their waters; surface tension prevents them from mingling with one another, just as if a thin wall were between them. The Amazon River's water pours into the Atlantic Ocean and yet preserves its traits even after it goes out 200 meters into the ocean.

- There are three main salinity regimes in coastal waterways: stratified; partially mixed and fully mixed.

<sup>(1)</sup> White, Harvey E. Modern College Physics, van Nostrand 1948.

### Qur'an on Darkness in the Seas and Internal Waves:

Allah says:

(Or [the state of a disbeliever] is like the darkness in a vast deep sea, overwhelmed with waves topped by waves, topped by dark clouds, (layers of) darkness upon darkness: if a man stretches out his hand, he can hardly see it! And he for whom Allah has not appointed light for him there is no light). (24:40)

It is well-known and affirmed scientifically that at extreme depths of the ocean there is no light, only darkness. The cause for this is that sunrays cannot reach it, for oceans range from being a few hundred meters deep to being 11034 meters deep.

The darkness in deep seas and oceans is found around a depth of 200 meters and below. At this depth, there is almost no light. Below a depth of 1000 meters there is no light at all. Therefore, most of the sun's rays are absorbed by the water at 100 meters. This portion of the sea is known as the luminous portion. Thereafter 1% of the sun's rays are visible at 150 meters, and 0.01% of the rays at 200 meters.

- This diagram shows the depth that light will penetrate in clear ocean water. Because red light is absorbed strongly, it has the shallowest penetration depth, and blue light has the deepest penetration depth. (Applied Optics, Vol. 20 (177) Smith, R.C. and K.S. Baker. 1981. Also see: <http://daac.gsfc.nasa.gov/oceanColor/scifocus/oceanColor/oceanblue.shtml>)

The ozone layer in the atmosphere reflects most of the ultra-violet rays, whereas the clouds reflect 30% and absorbs 19% of these rays. Only 51% of these rays reach the sea. Between 3% and 30% of the sunlight is reflected at the sea surface. Then almost all of the seven colors of the light spectrum are absorbed one after another in the first 200 meters, except the blue light.<sup>(27)</sup>

## Qur'an on Internal Waves:

Scientists have recently discovered that there are internal waves which "occur on density interfaces between layers of different densities."<sup>(28)</sup> The internal waves cover the deep waters of seas and oceans because the deep waters have a higher density than the waters above them. Internal waves act like surface waves. They can also

break, just like surface waves. Internal waves cannot be seen by the human eye, but they can be detected by studying temperature or salinity changes at a given location.

- Internal waves at interface between two layers of water of different densities. One is dense (the lower one), the other one is less dense (the upper one). (Oceanography, Gross, p. 204)

For example, the Mediterranean Sea's water is warm, saline, and less dense, compared to the Atlantic Ocean's water. When Mediterranean water enters the Atlantic over the Gibraltar sill, it moves several hundred kilometers into the Atlantic at a depth of about 1000 meters with its own warm, saline, and less dense characteristics. The Mediterranean water stabilizes at this depth. Although there are large waves, strong currents, and tides in these seas, they do not mix or transgress this barrier.

- Internal waves and scales of ocean mixing. (Oceanography, Chris Garrett. Also see: <http://www.nature.com/nature/journal/v422/n6931/full/422477a.html>)

- The major water masses in the deep ocean are differentiated by their temperature and salinity. These properties determine their relative densities, which in turn drive deep thermohaline circulation of the oceans. NADW = North Atlantic Deep Water. AABW = Antarctic Bottom Water. Modified from figure courtesy of Dr. Steve Hovan, Indiana University of Pennsylvania.

- A cumulonimbus cloud. This picture has been taken by NASA satellite. It is as though an invisible hand is pushing the cumulus clouds to the place of convergence

- An image of the atmosphere including its clouds and winds.

(1) See: Earth Science, Tarbuck, Edward J., Lutgens, Frederick J., pp. 509525-. Also see Mountain Meteorology, Whiteman, David C., pp. 100116-.

This information has only been known to us in this age, with the advanced technology and equipment available to view this. The Prophet lived in a desert climate far from the ocean, and he did not travel across any oceans. The fact that the Qur'an mentions this phenomenon indicates the veracity of the Qur'an.

## Qur'an on Formation of Clouds and Rain

Allah says:

(And it is He Who sends the winds as heralds of glad tidings, going before His Mercy (rain). Till when they have carried a heavy-laden cloud, We drive it to a land that is dead, then We cause water (rain) to descend thereon. Then We produce every kind of fruit therewith. Similarly, We shall raise up the dead, so that you may remember or take heed.) (7:57)

Allah says:

(And We send the winds fertilizing (to fill heavily the clouds with water), then cause the water (rain) to descend from the sky, and We give it to you to drink, and it is not you who are the owners of its stores [i.e. to give water to whom you like or to withhold it from whom you like].) (15:22)

Modern science has affirmed the scientific points mentioned in this verse of the Qur'an. The winds carry water particles which are rich in salt up into the atmosphere; these particles which are called "aerosols", function as water traps and form cloud drops by collecting around the water vapor themselves. The clouds are formed from water vapor that condenses around the salt crystals or dust particles in the air. Because the water droplets in these clouds are very small (with a diameter between 0.01 and 0.02 mm),

the clouds are suspended in the air, and spread across the

sky<sup>(1)</sup> Thus, the sky is covered in clouds. The water particles that surround salt crystals and dust particles thicken and form raindrops, so drops that become heavier than the air leave the clouds and start to fall to the ground as rain.

Allah says:

(See you not that Allah drives the clouds gently, then joins them together, then makes them into a heap of layers, and you see the rain comes forth from between them; and He sends down from the sky hail (like) mountains, (or there are in the heaven mountains of hail from where He sends down hail), and strikes therewith whom He wills, and averts it from whom He wills. The vivid flash of its (clouds) lightening nearly blinds the sight.) (24:43)

Rain clouds are formed and shaped according to definite systems and stages.

The formation stages of cumulonimbus, a type of rain cloud, are:

**1<sup>st</sup> stage: Being Driven**

**Along:** Clouds are carried along, that is, they are driven along, by the wind.

**2<sup>nd</sup> stage: Joining:** Then, small clouds (cumulus clouds) driven along by the wind join together, forming a larger cloud.

**3<sup>rd</sup> stage: Stacking:** When the small clouds join together, updrafts within the larger cloud increase. The updrafts near the centre of the cloud are stronger than those near the edges. These updrafts cause the cloud body to grow vertically so the cloud is stacked up. This vertical growth causes the cloud body to stretch into cooler regions of the atmosphere, where drops of water and hail formulate and begin to grow larger and larger. When these drops of water and hail become too heavy for the updrafts to support them, they begin to fall from the cloud as rain, hail, etc.

1st Stage

2nd Stage

3rd Stage

A cloud becomes electrified as hail falls through a region in the cloud of super-cooled droplets and ice crystals. As liquid droplets collide with a hailstone, they freeze on contact and release latent heat. This keeps the surface of the hailstone warmer than that of the surrounding ice crystals.

- Model for forked lighting. (a) The negative charge concentrated at the bottom of the cloud becomes large enough to overcome the air's resistance and develops a «leader» pointing towards the ground. (b) An upward flow of positive charges from the ground concentrates elevated points. (c) The downward flow of negative charges meets the upward flow of positive charges and a strong electric current known as return stroke carries the positive charges into the cloud.

When the hailstone comes in contact with an ice crystal, an important phenomenon occurs. Electrons flow from the colder object toward the warmer object. Hence, the hailstone becomes negatively charged. The same effect occurs when super-cooled droplets come in contact with a hailstone and tiny splinters of positively charged ice break off. These lighter positively charged particles are then carried to the upper part of the cloud by

updrafts. The hail falls towards the bottom of the cloud, thus the lower part of the cloud becomes negatively charged. These negative charges are then discharged as lightning. We conclude from this that hail is the major factor in producing lightning.<sup>(1)</sup>

Allah says:

(And thunder glorifies and praises Him, and so do the angels because of His Awe. He sends the thunderbolts, and therewith He strikes whom He wills, yet they (disbelievers) dispute about Allah. And He is Mighty in strength and Severe in punishment.) (13:13)

<sup>(2)</sup> The Bible, The Qur'an and Science.

## Qur'an on Animals

Allah says:

(And verily! In the cattle, there is a lesson for you. We give you to drink of that which is in their bodies, from between the undigested food and blood, pure milk; palatable to the drinkers.) (16:66)

**Maurice Bucaille said:**

“From a scientific point of view, physiological notions must be called upon to grasp the meaning of this verse. The substances that ensure the general nutrition of the body come from chemical transformations which occur along the length of the digestive tract. These substances come from the contents of the intestine. On arrival in the intestine at the appropriate stage of chemical transformation, they pass through its wall and towards the systemic circulation. This passage is effected in two ways: either directly, by what are called the “lymphatic vessels”, or indirectly, by the portal circulation. This conducts them first to the liver, where they undergo alterations, and from here they then emerge to join the systemic circulation. In this way everything passes through the bloodstream.

The constituents of milk are secreted by the mammary glands. These are nourished, as it were, by the product of food digestion brought to them via the bloodstream. Blood therefore plays the role of collector and conductor of what has been extracted from food, and it brings nutrition to the mammary glands, the producers of milk, as it does to any other organ.

Here the initial process which sets everything else in motion is the bringing together of the contents of the intestine and blood at the level of the intestinal wall itself. This very precise concept is the result of the discoveries made in the chemistry and physiology of the digestive system. It was totally unknown at the time of Prophet Muhammad ﷺ and has been understood only in recent times. I consider that the existence in the Qur'an of the verse referring to these concepts can have no human explanation on account of the period in which they were formulated.”<sup>(2)</sup>

# أَلَمْ نَجْعَلِ الْأَرْضَ مِثْقَالَ رَيْبٍ وَإِلْجَابًا لِقَتَابِكُمْ

- Have We not made the earth as a bed, and the mountains as pegs (78:6 -7)

## Qur'an on Mountains

Allah says:

(Have We not made the earth as a bed, and the mountains as pegs?) (78:6-7)

Scientists explain the importance of mountains as being pegs which stabilize the earth saying:

“Mountains have underlying roots. These roots are deeply embedded in the ground, thus, mountains have a shape like a peg. The earth’s crust is thirty to sixty kilometers deep, this being known due to the seismograph. Also, it is known due to this machine that every mountain has an underlying root, which stabilizes the crust of the earth with the underlying layers, and prevents the earth from shaking. Therefore, the mountain is similar to a nail, which holds different pieces of wood together.”<sup>(1)</sup>

Allah says:

(And He has affixed into the earth, mountains standing firm, lest it should shake with you; and rivers and roads, that you may guide yourselves.) (16:15)

Modern science attests to the fact that mountains are distributed evenly and perfectly on earth, which also stabilize the earth, especially those mountains which the geologists call ‘Asymmetrical Mountain Ranges’ which are to be found in every continent.<sup>(2)</sup> How then could an unlettered man, whose nation was mostly unlettered, know these facts?

- Isostasy: mountain masses deflect a pendulum away from the vertical, but not as much as might be expected. In the diagram, the vertical position is shown by (a) if the mountain were simply a load resting on a uniform crust, it ought to be deflected to (c). However because it has a deep ‘root’ of relatively non-dense rocks, the observed deflection is only to (b). Picture courtesy of Building Planet Earth, Cattermole pg. 35

<sup>(1)</sup> Earth, Press and Siever, p. 435. Also see: Earth Science, Tarbuck and Lutgens, p. 157. Also see: The Geological Concept of Mountains in the Qur’an, El-Naggar, p. 5. Also see: Earth Science Today, Murphy, Brendan; Nance, Damian. p. 107.

<sup>(2)</sup> The Geological Concept of Mountains in the Qur’an, El-Naggar, p. 5. Also see: Mountain Chains from World of Earth Science.

## Water and Life

- called Italian designer Mr. Daniele Gaspari has been on professionals and non-professionals to create a newspaper ad that inspires others to preserve water, now and for future generations. Mr. Gaspari won the competition for his ad "Wasting water will kill the future"

Allah says:

(Have not those who disbelieve known that the heavens and the earth were joined together as one united piece, then We parted them? And We have made from water every living thing. Will they not then believe?) (21:30)

Modern science affirms clearly that water is the basic component of life, with which the cell is built. Chemists have proven that water is a necessary and active substance used in changes and reactions which occur inside the body. For this reason it is the only fluid which every living thing needs, no matter how large or small it may be, starting with micro-organisms to the largest living animals on earth.

The water which covers the earth in this day and age is approximately 71% and the remainder 29% of the earth is dry land.

The main source for humans, animals and plants is water. It is proven by scientific analysis that the body of a human adult from the age of 15 years and upwards contains approximately 71% water. As for a child, his/her body contains 93% water. This indicates that 80% of water runs through the human body and the remainder is blood, and as much as 90% water is found in animals and plants.

وَجَعَلْنَا مِنَ الْمَاءِ كُلَّ شَيْءٍ حَيٍّ

- And We have made from water every living thing (21:30)

## Who are those who show Enmity towards Islam?

If we look at the religions of the world, one realizes that Islam is a religion loathed by many people. What is the reason for this open enmity? If we scrutinize those who openly display their enmity towards Islam, we can categorize them into one of the following categories:

01

**Polytheists and ignorant people**, as Islam is the religion of truth which disallows worshipping and showing humility to anything other than Allah.

Allah says:

(Say, [O Muhammad] 'Is it other than Allah that you order me to worship, O ignorant ones?') (39:64)

02

**Those whose natural dispositions have become adulterated**, as Islam is a religion which agrees with the natural disposition of humans.

Allah says:

(So direct your face (self) toward the religion, inclining to truth. [Adhere to] the natural innate state (Islamic Monotheism) in which Allah has created all people. No change should there be in the creation of Allah (by following other than that). That is the correct religion, but most of the people do not know.) (30:30)

03

**Unjust people**, as Islam is a religion of justice and equity.

Allah says:

(Indeed, Allah orders justice and good conduct and giving to relatives and forbids immorality and bad conduct and oppression. He admonishes you that perhaps you will be reminded.) (16:90)

04

**Those who seek to spread mischief and wrongdoing**, as Islam is the religion of righteousness and reform.

Allah says:

(...And they [the disbelievers] strive throughout the land [causing] corruption, and Allah does not like corrupters.) (5:64)

05

**Transgressors**, as Islam is the religion of peace.

Allah says:

(Fight in the way of Allah those who fight you but do not commit aggression. Indeed, Allah does not like aggressors.) (2:190)

06

**The fanatics and extremists**, as Islam is a moderate religion.

Allah says:

(And thus we have made you a moderate and just community that you will be witnesses over the people and the Messenger will be a witness over you.) (2:143)

07

**People who have lustful desires**, as Islam is a religion of chastity.

Allah says:

(And do not approach unlawful sexual intercourse (by avoiding all situations that might possibly lead to it). Indeed, it is ever an immorality and is evil as a way.) (17:32)

08

**Those who desire worldly life**, as Islam is a religion of mutual support and mercy which fights exploitation of people's needs and weaknesses.

Allah says:

(And do not consume one another's wealth unjustly or send it [in bribery] to the rulers in order that [they might aid] you [to] consume a portion of the wealth of the people in sin, while you know [it is unlawful].) (2:188)

09

**Those who scorn and belittle humanity and deem themselves a chosen race**, as Islam is a religion of equality which fights all forms of racism and prejudice.

Allah says:

(O mankind, indeed We have created you from male and female and made you peoples and tribes that you may know one another. Indeed, the most noble of you in the Sight of Allah is the most righteous of you. Indeed, Allah is Knowing and Acquainted.) (49:13)

Dear reader, after having read this far, I believe many of the notions that you may have come across in the media about Islam have already started to crumble and the truth about Islam is becoming more apparent. Let us note down for you the key qualities of Islam:

01

Islam is the religion of truth which disallows worshipping and showing humility to anything other than Allah. Allah, the Exalted, says:  
(Say [O Muhammad ﷺ] 'Is it other than Allah that you order me to worship, O ignorant ones?') (39:64)

02

Islam is a religion of peace that denounces all forms of injustice and tyranny. Allah, the Exalted, says:  
(Allah does not forbid you from those who do not fight you because of religion and do not expel you from your homes - from being righteous toward them and acting justly toward them. Indeed, Allah loves those who act justly.) (60:8)

03

Islam is a religion that encourages education and the spread of knowledge. Allah, the Exalted, says:  
(Say, "Are those who know equal to those who do not know?" Only they will remember [who are] people of understanding.) (39:9)

04

Islam is a religion of purity and hygiene. Allah, the Exalted, says:  
(Indeed, Allah loves those who are constantly repentant and loves those who purify themselves.) (2:222)

05

Islam is a religion of justice and good conduct. Allah, the Exalted, says: (Indeed, Allah orders justice and good conduct and giving to relatives and forbids immorality and bad conduct and oppression. He admonishes you that perhaps you will be reminded.) (16:90)

06

Islam is a religion of ease. Allah, the Exalted says:  
(Allah intends for you ease and does not intend for you hardship.) (2:185)

07

Islam is a religion of mercy. The Prophet ﷺ said:  
"Those who are merciful will be shown mercy by God. Be merciful to those on the Earth and God shall be merciful to you." (Tirmidhi)

08

Islam is a religion of complete justice. Allah, the Exalted, says: (Do not let the hatred of a people prevent you from being just. Be just; that is nearer to righteousness.) (5:8)

09

Islam is a religion that calls for cooperation in goodness. Allah, the Exalted, says: (And cooperate in righteousness and piety, but do not cooperate in sin and aggression.) (5:2)

10

Islam is not a religion for a select group, race or ethnicity. It is for humankind at large. Allah, the Exalted, says: (And We have sent you comprehensively to mankind as a bringer of good tidings and a warner. But most of the people do not know.) (3:103)

11

Islam is a religion that effaces all sin. Allah, the Exalted, says: (Say, 'O My slaves who have transgressed against themselves [by sinning], do not despair of the mercy of Allah. Indeed, Allah forgives all sins. Indeed, it is He who is the Forgiving, the Merciful.') (39:53)

## Distinguishing Qualities and Privileges of Islam

Since Islam is the last religion, it has distinguished qualities and privileges which make it suitable for all times and places:

- ▶ It is the last Divine Religion revealed to man.
- ▶ Islam recognizes previous divine revelations. On the other hand, Jews do not recognize Jesus, and the Christians do not recognize Muhammad ﷺ; whereas Muslims recognize Moses, Jesus and all the prophets, may Allah exalt their mention.
- ▶ In Islam, humans relate with their Lord in all matters and conditions.
- ▶ Islam is the only religion which has not been distorted or changed.

Harry G. Dorman said: “It (the Qur’an) is literal Revelation of God, dictated to Muhammad by Gabriel, perfect in every letter. It is an ever-present miracle witnessing to itself and to Muhammad, the Prophet of God. Its miraculous quality resides partly in its style, so perfect and lofty that neither man nor jinn could produce a single chapter to compare with its briefest chapter, and partly in its content of teachings, prophecies about the future, and amazingly accurate information such as the illiterate Muhammad could never have gathered of his own accord.”<sup>(34)</sup>

- ▶ Islam is the religion which covers the material and spiritual aspects of life. It does not neglect even the slightest of things in a Muslim’s life. Abdur-Rahman son of Zaid said that it was said to Salman: “Your Prophet has taught you everything, even how to relieve yourselves? Salman said: ‘Of course, he forbade us to face the direction of the Qiblah while defecating or urinating, or to clean oneself with his right hand, or to use less than three stones, or to use bone or dung (to clean oneself).’” (Muslim)

W. Thomas Arnold <sup>(1)</sup> said: “Sense of justice is one of the most wonderful ideals of Islam, because as I read in the Qur’an I find those dynamic principles of life, not mystic but practical ethics for the daily conduct of life suited to the whole world.”

<sup>(1)</sup> Sir Thomas Walker Arnold  
(1864 -1930)

- ▶ Islam satisfies human bodily and spiritual needs in equilibrium. It refuses to allow that one aspect be given precedence over the other.

Prince Charles <sup>(2)</sup> said:

“Islam can teach us today a way of understanding and living in the world which Christianity itself is poorer for having lost. Islam refuses to separate man and nature, religion and science, mind and matter.”

<sup>(2)</sup> Prince Charles

- ▶ Islam does not conflict with human intellect or natural disposition.
- ▶ Islam is the religion for humankind at large, regardless of their education, time and place. This is in contrast to previous religions which were sent to specific people at a specific time. For example, if a person wants to become a Jew, he has to be born a Jew. Jesus said about Christianity: ‘I was sent to the lost sheep of the Children of Israel. Islam is a universal religion that it is fit for all people at all times, regardless of their race or language. It is the Word of God: (And We have not sent you except as a giver of glad tidings and a warner to mankind. But most of the people do not know.) (34:28)

In these verses God commands His Prophet ﷺ to openly call to Islam, so he called his people to worship God alone, and to cast aside all false deities. He was harmed by his people, yet he remained steadfast and merciful. He sent letters to the Kings of his time and invited them to accept Islam. Among those whom he wrote to were the Emperor of Rome, the Emperor of Persia, and the King of Abyssinia. If the message of Prophet Muhammad was not a universal one, he would not have invited the rulers of different kingdoms close to Arabia to accept Islam. This

would possibly open more than one front with adversaries who were well equipped and great in number. Why would he venture to do something like this if it were not but a divine Message from God which he was ordered to convey to mankind at large!

The Messenger of Allah said: ‘This matter (i.e. the religion of Islam) will become apparent as night and day. Every person in a city or desert area will come to know of this religion, by means of might or disgrace. Might by which Islam is honored and disgrace by which God disgraces disbelief.’ (Ahmad)

## 34 Conclusion

The Divine Religion, Islam, is complete in all aspects. It is the constitution for a fulfilling life in this world, and an eternal and everlasting one in the Hereafter. You may find some deviated manners or faults in the way Muslims deal with themselves and others, but know that Islam has nothing to do with these shortcomings. This may be due to their ignorance of the religion or weakness in their faith which leads them to do what you see. So do not judge Islam according to what you may experience from some of its followers. This small publication should be regarded as a key to start researching the Truth. However, to further study Islam:

- 01 — Remove any prejudice.
- 02 — Have a true desire to reach the Truth and not seek faults and errors.
- 03 — Think independently and should not blindly follow others.

Allah says:

(And when it is said to them, “Follow what Allah has revealed,” they say, “Rather, we will follow that upon which we found our fathers.” Even if Satan was inviting them to the punishment of the Blaze? ) (31:21)

## How Does One Become a Muslim?

In order to become a Muslim, there are no specific religious rituals or customs that you need to perform, either in specific areas or in the company of others. This is because, in Islam, a person has a direct relationship with his Lord without any intermediaries.

By simply believing and declaring that there is only one God and that Muhammad is His slave and Messenger one thereby becomes Muslim. Upon making this statement sincerely every sin in his/her life up to that point is forgiven.

God says in the Holy Qur'an (Except those who repent and believe and do righteous deeds; for those, God will change their sins into good deeds, and God is Ever Oft-Forgiving, Most Merciful) (25:70) You begin life again as a Muslim, one who submits to the will of God.

As for non-Muslims who have accepted Islam, they will be given their reward in double, due to their belief in their messengers as well as their belief in Muhammad ﷺ.

Allah says:

(Those to whom We gave the Scripture [Torah and the Gospel, etc.] before it, - they believe in it (the Qur'an). \* And when it is recited to them, they say: We believe in it. Verily, it is the truth from our Lord. Indeed even before it we have been from those who submit themselves to Allah in Islam as Muslims. \* These will be given their reward twice over, because they are patient, and repel evil with good, and spend (in charity) out of what We have provided them ) (28:52-54)

In addition to this, Allah effaces all the sins they did before accepting Islam. The Prophet ﷺ said:

"Islam effaces all [the sins one did] before it?" (Muslim).

Allah says:

(We will show them Our Signs in the universe, and in their own selves, until it becomes manifest to them that this (the Qur'an) is the truth. Is it not sufficient in regard to your Lord that He is a Witness over all things?) (Qur'an 41:53)

**Allah says:**

❖ We will show them Our Signs in the universe, and in their own selves, until it becomes manifest to them that this (the Qur'an) is the truth. Is it not sufficient in regard to your Lord that He is a Witness over all things? ❖ (Qur'an 41:53)

# THE KEY TO UNDERSTANDING ISLAM

This book states from the outset that the Qur'an is not a book of science. However, Islam respects science and scientists, giving them high status in Islamic society, and tells its followers to afford scientists the respect they deserve. The author informs his readers that he has no intention to relate the Qur'an to modern scientific discoveries. He only cites Qur'anic verses that refer to such discoveries as science have made in our present time.

The book explains that Islam is a faith that lays down a complete way of life. It makes clear that Islam is a faith that liberates human beings, through advocating the worship of the One and True God. It condemns aggression and injustice. It promotes learning and the acquisition of knowledge. It advocates purification, cleanliness, justice, perfection, tolerance, compassion, mercy, helping others and absolute justice for all humanity. It is addressed to all humanity, making no distinction between human beings. God has bestowed Islam as an act of His mercy to the whole world.

It is our hope that readers will enjoy reading this book and that, along with other releases by the Osoul Global Centre, it will give them what they want to know about Islam.
